

Wall-Mounted Folding Bariatric Therapy Table

SKU: ADI996-06-BLK ADI996-06-BLU

Maximize space without compromising functionality with our **Wall-Mounted Folding Bariatric Therapy Table**. Built for stability, this table has a three-front-leg design that locks securely in place, providing a solid foundation for treatments. The generously sized surface, layered with 2-inch foam padding, offers optimal patient support and comfort. The antimicrobial PU leather upholstery promotes hygiene in high-traffic medical environments. The expansive surface area provides ample room for a therapist to sit or lean alongside the patient, facilitating techniques that require close interaction, such as assisted range-of-motion exercises, soft tissue manipulation, or postural training. Ideal for physical therapy clinics, rehabilitation centers, hospitals, sports medicine facilities, and wellness studios, this space-saving solution seamlessly integrates into any professional setting. When not in use, the foldable design allows for vertical storage, minimizing floor space usage—perfect for small treatment rooms, multi-purpose spaces, and home therapy setups.

Features

Stable: The three-front-leg design locks securely, ensuring a firm, balanced surface.

Compact: The wall-mounted foldable design allows easy storage in compact treatment areas.

Comfortable: 2-inch mattress padding provides superior support for extended sessions.

Protective: An edge bumper reinforces the table's perimeter, preventing wear and damage.

Robust: With a 500 lb. bariatric weight capacity, this table supports many therapeutic applications.

Spacious: A large treatment area accommodates both patients and practitioners for hands-on therapy techniques.

Hygienic: Its antimicrobial Black and Midnight Express PU leather upholstery helps maintain a clean and sanitary environment.
