

Assembly Instruction

Instruction de montage

12x20ft Cedar Framed Galvanized Steel Double Roof Gazebo

EN: Four or more people are required for assembly

FR: Quatre personnes ou plus sont nécessaires pour l'assemblage

EN: The following tools are not included and needed for assembly

FR: Les outils suivants ne sont pas inclus et nécessaires pour l'assemblage

				
Drill Perceuse	Hammer Marteau	Tape Mètre ruban	Screwdriver Tournevis	Stepladder Escabeau

EN: Note:

1. The gazebo come with 8 carton boxes.
2. Wearing protective gloves is recommended.
3. Do not fully tighten screws prior to complete assembly.

FR: Avis:

1. Le gazebo est livré avec 8 boîtes en carton.
2. Le port de gants de protection est recommandé.
3. Ne serrez pas complètement les vis avant de terminer l'assemblage.

EN

Before You Start

-  Please read all instructions carefully.
-  Retain instructions for future reference.
-  Separate and count all parts and hardware.
-  Read through each step carefully and follow the proper order.
-  We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
-  Always place the product on a flat, steady and stable surface.
-  Keep all small parts and packaging materials for this product away from babies and children as they potentially pose a serious choking hazard.

FR

Avant de Commencer

-  Veuillez lire attentivement toutes les instructions.
-  Conservez les instructions pour vous y référer ultérieurement.
-  Vérifiez toutes les pièces et les accessoires.
-  Lisez attentivement chaque étape et suivez l'ordre correct.
-  Nous recommandons que, dans la mesure du possible, tous les produits soient assemblés à proximité de la zone où ils seront utilisés, afin d'éviter tout déplacement inutile du produit une fois assemblé.
-  Placez toujours le produit sur une surface plane et stable.
-  Conservez toutes les petites pièces de ce produit et les matériaux d'emballage hors de portée des bébés et des enfants, car ils pourraient présenter un risque d'étouffement.

Care and Maintenance

1. Our steel components for garden accessories and furniture are treated with rust inhibiting paint that protects it from rusting. However, due to the nature of steel, surface oxidation (rusting) will occur once these protective coatings are scratched. This is not a defect and thus not covered by the warranty.
2. To minimize this condition, we recommend care when assembling & handling the product to prevent scratching the paint. Should any scratching or damage occur, we recommend immediate touch-up with rust inhibiting paint.
3. Surface rust can also be easily removed with a very light application of common cooking oil. If surface oxidation (rusting) occurs and if no measure is taken to prevent this, the oxidation may start dripping on to deck or patio and caused damaging stains, which may be difficult to remove. This can be prevented if the above-mentioned measures are taken to keep the product from oxidizing.
4. Use damp cloth to wipe off the stains as quickly as possible.
5. If necessary, wash with a mild solution of soap and water; rinse thoroughly and dry completely.
6. Periodically check and ensure that all bolts are well-tighten during use.

FR:

Maintenance préventive et corrective

1. Les composants en acier des meubles et accessoires de jardin sont traités avec une peinture antirouille pour les protéger de la rouille. Cependant, en raison de la nature de l'acier, une oxydation de surface (rouille) se produira une fois ces revêtements protecteurs rayés. Ce qui n'est pas un défaut et n'est donc pas couvert par la garantie.
2. Afin de minimiser l'occurrence de cette situation, nous vous recommandons de veiller lors de l'assemblage et de la manipulation du produit à éviter de rayures sur la peinture. En cas de rayures ou de dommages, il est recommandé de les réparer immédiatement par une peinture antirouille.
3. La rouille de surface sera également facilement éliminée avec une très légère application d'huile de cuisson courante. Si une oxydation de surface (rouille) se produit et qu'aucune mesure n'est prise, l'oxydation peut commencer à s'égoutter sur la terrasse ou le patio, provoquant des taches dommageables qui seront difficiles à enlever. Les mesures mentionnées ci-dessus sont pour éviter l'oxydation du produit.
4. Nettoyez les taches dès que possible avec un chiffon humide.
5. Si nécessaire, lavez-le avec une solution d'eau et de savon doux, puis le rincez et séchez complètement.
6. Vérifiez périodiquement et assurez-vous que tous les boulons sont serrés pendant l'utilisation.
