

VanZyverden's BUTTERFLY MAGNET COLLECTION

The plants in this collection are pollinator magnets. Pollinators are a vital part of life on earth as they pollinate most flowering plants. They do this by transferring pollen from bloom to bloom. Pollinators have been in decline due to habitat loss and disease. This collection was created to provide shelter and food for native pollinators to thrive. It is surprisingly easy and lots of fun to attract them to your garden for spectacular entertainment. Please help sustain the pollinator populations.

Helps the pollinators thrive

*Varieties in this collection are
wildlife magnets*

*Pollinators are vital for pollinating
flowering plants*

About This Variety: This collection consists of: 5 Hemerocallis Stella d' Oro, 3 Salvia nemorosa Mainacht and 5 Echinacea purple coneflower roots. Planting stock is individually packed, bagged and labeled.

Growing Instructions: To ensure optimal results, allow adequate space and sunlight, plant at the appropriate depth, and feed with a well balanced fertilizer. Best planted in early spring, after last frost, so they can establish themselves before hot weather arrives. Some gardeners treat perennials as annuals. For an informal look, plant in groups in natural swathes.

Care Tip: Newly planted roots need extra moisture during their first year in the garden to ensure that they form a solid root system.

Blooms: Summer

Exposure: Full sun

Height: Grows 12-24" tall

Spacing: Plant 12-18" apart, 1-2" deep

USDA Zones: Hardy in USDA zones 4-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
