HINGE ADJUSTMENT INSTRUCTIONS

Door Installation:

Please note, the cabinet box must be level and plumb for the door to work properly. Under certain conditions, wall surfaces may not be plumb, which results in a slight gap, either at the top or bottom, or between the doors.

Carefully hold the door and slide the hinge onto the hinge plate. Please note, the pin on the hinge slides into the slot of the hinge plate and the slot in the hinge slides under the screw head. Tighten the hinge screw to secure the door to cabinet.

Door Adjustment Procedure:

Please note, care must be taken during hinge adjustment to avoid damage.

Only a slight adjustment is required. Rotate the Door Adjustment screws 1/8 to 1/4 turns at a time, then check the door position. Rotate adjustment screws as necessary until doors are properly aligned.
