Solar Panel Installation

Connect your battery camera to the solar panel and keep your battery charged.

STEP 1

Place the bracket where you wish to install the solar panel. Mount in a location that receives direct sunlight and within 13 feet of the camera.

STEP 2

Use the bracket to mark the holes.

STEP 3

Drill holes using a 3/16" drill bit.

STEP 4

Screw in the mounting plate.

Screw the solar panel onto the wall bracket and then attach the USB cord on your solar panel to the USB drive on the bottom of your battery camera.
