

ModernPergolaKits

Use & Care Manual

What should I use to clean my pergola?

The durable vinyl exterior of your Modern Pergola Kit will maintain its beauty for years to come. For spring cleaning of dirt and grime, mix a basic all-purpose cleaner such as Simple Green® with hot water, then scrub with a soft bristle brush. You can also tackle hard-to-clean stains with a Mr. Clean® Magic Eraser®.

Can I use a power washer to clean my pergola?

We do. A power washer is an excellent way to avoid any brush cleaning. Please take into consideration the power of your machine. There are commercial power washers that are strong enough to remove the paint off your new car.

Too much pressure or moving the spray nozzle too close to the vinyl can damage it. You might be surprised to find out how well a normal hose with a good spray nozzle works too!

How often do I have to clean my pergola?

This is really going to be up to you. Cleaning the pergola with the above-mentioned methods a couple times a year will keep it looking new. You do not have to clean your pergola at all if you do not want to. Just know that as with all things outside some dirt and grime will build up over time. Most people clean their pergola before an event such as a family gathering or a party.

What if I damage part of my pergola – how do I get a replacement piece?

You may reach out to Home Depot and they will provide you a direct contact to the manufacturer. It's not common that anything ever gets damaged, but accidents do happen. The manufacturer will be able to quickly give you an answer on how to replace the part and the cost associated with it.
