Works with
Hey Google or Alexa

Connect your Smart Heater to your Alexa or Google Assistant-enabled devices.

Control your heater, wherever you are

The atomi smart app lets you control your heater at home or remotely. It lets you monitor real-time temperature in your room.

What can you do on the atomi smart app?

- See if the smart heater is on or off
- Change the temperature setting
- Turn the smart heater on or off
- Check the current temperature in the room
- Set a weekly schedule
- Set a countdown timer
- Check how much time is left on the timer
- Set mode to High, Low or ECO
- Name your various devices for easy monitoring

Use with or without the app

Conveniently placed on top of the smart heater is an easy-to-read digital display and controls. Easily see the temperature that has been set and the length of time the built-in timer has been set for. You'll also find an LED indicator for high and low heat or the ECO setting.

Easy-Carry Handle
Designed with carry handle on the back of the tower heater so you can move the heater from your bedroom to living room with great ease. It's convenient and easy.

Removable Dust Filter
The washable dust filter is specially designed to remove pollutants and allergens, improving the overall air quality

ETL Listed
ETL is a Nationally Recognized Testing Laboratories (NRTL). NRTLs are in place to provide independent safety and quality certifications on products.
