CARING FOR FABRIC UPHOLSTERED FURNITURE

To keep your upholstered furniture looking clean and comfortable, follow these care and maintenance instructions:

REGULAR VACUUMING

Use a vacuum cleaner with a upholstery attachment to remove loose dirt, dust, and debris from the fabric. Regular vacuuming prevents dirt from embedding itself into the fibers.

BLOT SPILLS IMMEDIATELY

Accidents happen. When spills occur, blot them immediately with a clean, dry cloth or paper towel. Avoid rubbing the stain, as this can push it further into the fabric.

CLEAN STAINS GENTLY

For more stubborn stains, use a mixture of lukewarm water and a mild detergent. Test the solution in an inconspicuous area first to ensure it doesn't damage the fabric. Dab the stain gently, working from the outside in. Rinse the area with clean water and blot it dry with a clean cloth.

SUN PROTECTION

Position your upholstered furniture away from direct sunlight, as prolonged exposure can cause fading and weakening of the fabric fibers. Consider using curtains or blinds to shield the furniture from the sun.

AVOID HARSH CHEMICALS

Refrain from using harsh chemicals or abrasive cleaners on upholstery, as they can damage the fabric and its color.

PET PRECAUTIONS

If you have pets, regularly remove pet hair from the upholstery using a lint roller or a pet hair remover tool. Consider using furniture covers or throws to protect against potential damage from claws and accidents.

By following these care and maintenance tips, you can ensure that your upholstered furniture remains clean, comfortable, and attractive for many years, providing a cozy and stylish addition to your space.

CARING FOR WOOD FURNITURE

Wood furniture adds warmth and character to your home but requires proper care to maintain its beauty and durability. Follow these essential tips to ensure your wood furniture remains in excellent condition for years to come:

REGULAR DUSTING

Dust your wood furniture regularly with a soft, dry cloth or a microfiber duster. This prevents the buildup of dust and particles that can scratch the wood's surface.

AVOID DIRECT SUNLIGHT

Position your wood furniture away from direct sunlight or use window coverings to protect it. Sunlight can cause fading and drying out of the wood over time.

USE COASTERS AND MATS

Place coasters or placemats under hot and cold beverages, dishes, and flower vases to prevent heat rings and water stains on wooden surfaces.

GENTLE CLEANING

Use a mild, non-abrasive wood cleaner or a mixture of mild dish soap and water for regular cleaning. Dampen a soft cloth with the solution, wipe the surface, and dry it thoroughly.

WIPE SPILLS PROMPTLY

Accidents happen. When spills occur, wipe them up immediately with a clean, slightly damp cloth to prevent staining and warping

REPAIR SCRATCHES AND DENTS

Use a wood touch-up pen or wax stick that matches the furniture's finish for minor scratches. For deeper scratches or dents, consult a professional furniture repair expert.

AVOID HARSH CHEMICALS

Please refrain from using abrasive cleaners, ammonia-based products, or harsh chemicals on your wood furniture, as they can strip the finish or damage the wood.

HANDLE WITH CARE

Lift and move furniture items rather than dragging them, as this can cause scratches and damage to the furniture and the floor.

GENTLE STORAGE

If you need to store wooden furniture for an extended period, do so in a climate-controlled environment to prevent warping or cracking.

By following these care and maintenance guidelines, you can ensure that your wood furniture continues to enhance your living space with its timeless charm and elegance.
