

This product contains certain components made of brass, such as the service valves on the outdoor unit where the piping kit gets connected, etc.

Brass is a very common industrial alloy, that contains mainly copper, zinc and small amounts of lead and nickel to improve its machining characteristics.

Because of this reason, State of California regulations require us to provide the California Consumers of this product with a specifically worded warning. According to their belief, if touched, certain chemicals can pass through human skin and cause certain health problems. If you must come in contact with any of these materials (for example during installation), you are recommended to wear work gloves and wash your hands afterwards. All California residents must read the below proposition 65 warning.

WARNING: This product can expose you to chemicals, including lead, which are known to the State of California to cause cancer, birth defects or reproductive harm. For more information, visit www.P65Warnings.ca.gov
