Spotlights™

Spotlights' FiberMate® Frame

Your Spotlight™ door will need a stylish frame to match. Spotlights' FiberMate® molded frame can be easily painted. FiberMate's material formulation outperforms lesser quality frames; the frame's construction resists both warping and deformation from heat buildup and can be used with dark finishes.

Spotlights' **compression foam tape seal** construction eliminates the oozing and sticky mess of wet caulk products. The frame seal's design is also engineered to extend the life of your door frame. Insulated glass and a well-constructed frame unit make Spotlights energy efficient.
