

Siemens offers standard extended warranties on a selection of products that allows you to protect your investment for years to come.

Standard Warranty

Siemens Industry, Inc. warrants that on the date of shipment the goods are of the kind and quality described herein and are free of non-conformities in workmanship and material. This warranty does not apply to goods delivered by Siemens but manufactured by others. Buyer's exclusive remedy for a non-conformity in any item of the goods shall be the repair or the replacement (at Siemens' option) of the item and any affected part of the goods. Siemens' obligation to repair or replace shall be in effect for a period of one (1) year from initial operation of the goods but not more than eighteen (18) months from Siemens' shipment of the goods, provided Buyer has sent written notice within that period of time to Siemens that the goods do not conform to the above warranty. Repaired and replacement parts shall be warranted for the remainder of the original period of notification set forth above, but in no event less than 12 months from repair or replacement.

Siemens Services

Siemens warranties cover non-conformities in workmanship and material. Any additional related costs, including but not limited to labor, freight, and mileage are not covered under the Terms and Conditions of Sale. Furthermore, field modifications and improper applications of products void the terms of the warranty. Siemens combines world-class expertise with local knowledge in order to provide our valued partners with the most cutting-edge products in the market.
