

## Sewage Basin ( 18 x 30 in. )

**Model: SF30BA**

Made in the USA

This sewage basin is designed to hold a sewage pump and can also be used in sump and effluent pump applications. The single piece basin is injection molded polyethylene structural foam and provides superior structural toughness and reliability. This basin features a factory punched inlet that accepts drain tile and 4 in. inlet hubs, flanges or grommets. The rim of the basin includes pre-drilled holes with metal inserts to accept the mounting and securing of a cover. The cover for the basin is sold separately.

### Specifications

- **Material:** Polyethylene Structural Foam
- **Inserts:** Metal
- **Weight:** 16 lbs.
- **Total Capacity:** 30 gallons

### Features and Benefits

- 30 gallon capacity
- Heavy duty structural foam injection molded construction
- Ultra strong, reinforced bottom will not flex
- Cover mounting metal inserts included on basin
- Gas and radon tight
- Dozens of cover options available
