indoor color*

Easy-to-grow holiday color

Timeless beauty

About This Variety: This paperwhite kit comes with everything you need to grow these fragrant bulbs: three bulbs, a 5" x 5.25" trendy white plastic conical decorative outer planter, planting medium, and a set of growing instructions. Because bulbs are natural storage organs, they already contain the energy needed to produce flowers.

Growing Instructions: Paperwhites are tender bulbs and need to be planted in pots indoors throughout most of North America. To grow indoors as a houseplant, expand the soil block included with the kit according to the directions, then fill about half the pot with the planting medium. Set the bulbs on top of the soil, filling in around them to hold them in place. Leave the top third of each bulb exposed above the soil level and allow room in the pot for watering. Paperwhite bulbs prefer normal room temperatures, and exposure to bright light helps keep the stems shorter. As the flower stalks grow toward the light, rotate the pot frequently to prevent toppling. Sit back and enjoy!

Care Tip: Paperwhites root best at cooler temperatures below 60°F. Once rooted, a somewhat warmer household temperature is preferred, but avoid conditions that are too hot or too dry, as they may hinder flowering. Lower light levels can also cause taller, leggier growth.

Blooms: Winter

Exposure: Full sun to partial shade

Height: Grows 12-18" tall

Spacing: Plant 1-2" deep

USDA Zones: Hardy in USDA Zones 8-10

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
