

Tips:

- To help your cat get acclimated to the Litter Spinner™, transfer some litter from the old cat box into the Litter Spinner™.
- For best results, it is important to maintain the litter level. Use the "LITTER LEVEL LINE" inside the unit as a gauge. Adding small amounts often is best.
- After spinning, tap the Drawer a couple of times with your palm before removing it. This will help knock off any loose litter.
- Use a small mat in front of the Litter Spinner™ to catch stray litter and help clean your pet's paws.
- Any clumps attached to the inside of the drum can easily be knocked loose with the provided Clump Stick before spinning the drum. See photo on other side.
- For thorough cleaning, remove the Drawer and the black Plug in the back, pour out all the litter through the hole, and wash. Dry thoroughly. Replace the Plug and Drawer, then refill with fresh litter.
- By rotating the Drum a bit more than one full turn, then back to the starting position, your cat's litter will be level for the next use.
- For kittens, cats with arthritis, or cats who prefer to have their front paws outside the litter box, place a few books in front to create a step into the Litter Spinner™.

I am confident the Litter Spinner will simplify your life. Thank you for your purchase. Enjoy!

HOW TO ASSEMBLE

Step 1:

Align BASE halves and snap together.

Step 2:

Insert SLIDE GUIDE into back half of DRUM. (Note arrow on SLIDE GUIDE) Push in completely.

Slide Guide

Step 3:

Align arrow on DRUM halves. With a Phillips screwdriver, assemble DRUM using the screws provided.

Align arrow halves

No power tools please!

Step 4:

Insert DRAWER and make sure DRAIN PLUG is pushed in securely on back of DRUM.

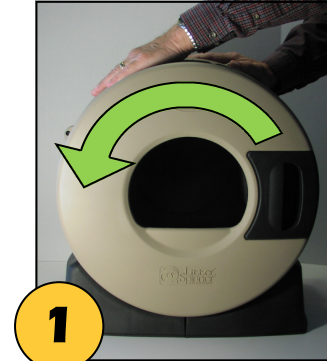

Drain Plug

Step 5:

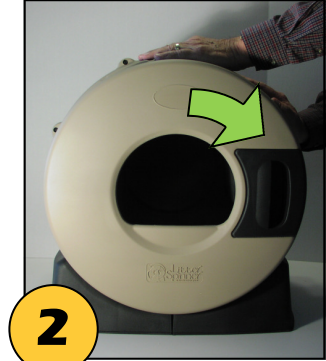

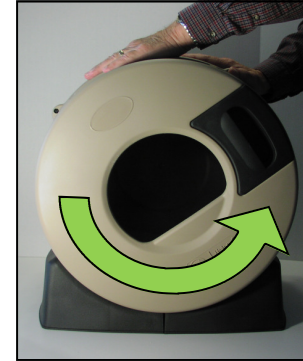

Fill DRUM with 2-3/4" of your cat's favorite clumping litter and place DRUM on BASE!

HOW TO USE

To clean your Litter Spinner™, place your hands on top of the DRUM. Using a hand-over-hand motion, slowly spin the DRUM slightly more than one rotation. (see illustration above)

Rotate backwards to the starting position to level the litter for the next use.

Tip: After rotating, be sure the DRUM is resting securely on the BASE at the starting position. There are notches on the DRUM to hold it in place on the BASE, which prevents unwanted movement.

Remove drawer, discard waste, and replace the drawer. That's it!

Remember: Maintain the litter level by regularly checking the "Litter Level Line" located inside drum. Frequently add small amounts of litter to maintain the proper litter level.

***For best results,** spin your Litter Spinner™ one time per day per cat.

Tip: To reduce stray litter, give the handle a couple of firm taps before removing the DRAWER.

Clump Stick

Tip: If you notice any clumps attached to the inside of the DRUM, dislodge them with the provided CLUMP STICK. Then, spin the DRUM one more time to clean the litter.
