

Van Zyverden's
100 DAYS OF BLOOMS GROW ANYWHERE GARDEN

100 days of flowers garden. One of the first choices you might make for your garden is what color or colors to use to fit your personality best and set the mood of your garden. Some colors pair well together, while others may tension. One way to create a unified garden is to use colors sparingly, creating so-called color echoes throughout the garden.

Blooms up to 100 days

*Collection of early, mid and late
spring bloomers*

*An incredible value for spring
garden color*

About This Variety: Collection consists of varieties that bloom early, mid and late spring for nearly 100 days of blooms. Easy to grow nearly anywhere.

Growing Instructions: Plant spring-blooming varieties in the fall, before the first frost hardens the soil. Dig a hole to the required depth. Place bulb(s) in hole, pointed side(s) up. Cover with soil and water thoroughly. Mulch in extreme climates.

Care Tip: For container planting, bury the bulb three times as deep as the bulb is wide. In zones 6 and below, you will need to protect your bulb containers. Place them near the foundation of the house or other structure. In zones 3-5, place the container in an unheated garage or shed. After blooming, leave the bulbs in place so plants can clump or reseed. Divide only when containers or planting spaces become too crowded. Propagate in the fall by division after they have been chilled for four weeks in a moist medium. Dig, dry, clean and store in a dry, cool place at 40-50°F to over winter in non-hardy zones.

Blooms: Spring

Exposure: Full Sun to Partial Shade

Height: Grows 5-12" tall

Spacing: Plant 2-6" apart, 2-3" deep

USDA Zones: Hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
