

UNDERSTANDING THE NFRC LABEL

ENERGY STAR compliance available in all series. Verify product specifics before ordering.

U-FACTOR measures the heat from inside a room that can escape. The **LOWER** the number, the lower the potential for wasted heating expenses.

SOLAR HEAT GAIN COEFFICIENT measures the amount of outdoor heat that can enter a room. The **LOWER** the number, the lower the potential for wasted cooling expenses.

VISIBLE TRANSMITTANCE measures how much natural light can come into a room. A **HIGH** number means more natural light.

AIR LEAKAGE measures how much air will enter a room through the product. The **LOWER** the number, the lower the potential for a draft through the product.

An example of the NFRC label you should look for:

U-FACTOR ratings generally fall between 0.20 and 1.20. The **LOWER** the better a product is at keeping heat in. U-Factor is particularly important during the winter season.

SOLAR HEAT GAIN COEFFICIENT (SHGC) is expressed as a number between 0 and 1. The **LOWER** the better a product is at blocking unwanted heat gain. Blocking solar heat gain is particularly important during the summer season.

 National Fenestration Rating Council®	*No Grid* TrpIGlazed MFR#073 RELIABILT SERIES: 3900 VINYL Double Hung Triple IG Low-e-Argon ADW-A-356-00091-00009	
	ENERGY PERFORMANCE RATINGS	
U Factor (U.S./I-P) 0.21	Solar Heat Gain Coefficient 0.18	
ADDITIONAL PERFORMANCE RATINGS		
Visible Transmittance 0.34	Air Leakage (U.S./I-P) ≤ 0.3	
<small>Manufacturer stipulates that these ratings conform to applicable NFRC procedures for determining whole product performance. NFRC ratings are determined for a fixed set of environmental conditions and a specific product size. NFRC does not recommend any product and does not warrant the suitability of any product for any specific use. Consult manufacturer's literature for other product performance information. www.nfrc.org</small>		

AIR LEAKAGE measures how much air will enter a room through the product. The **LOWER** the number, the lower the potential for a draft through the product.

NFRC administers an independent, uniform rating and labeling system for the energy performance of fenestration products including windows and doors. For more information on NFRC, visit their website at www.WindowRatings.org
