## Download and Install the Xodo Smart APP

Download and install the APP. It can be also be found by searching "XODO Smart" by Contixo Inc. in the App Store (for IOS) or Google Play Store (for Android).

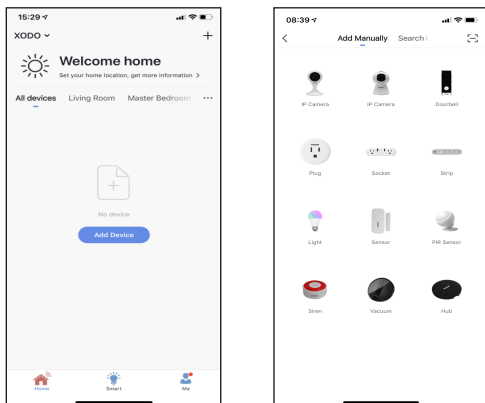

Xodo Smart

Open the APP

The welcome screen will appear and then you will be asked to login or register a profile. Register an account by entering your email address and setting up a profile or logging in with an existing account.
Adding Devices

You will be able to manually add a device. Select IP Camera to continue.

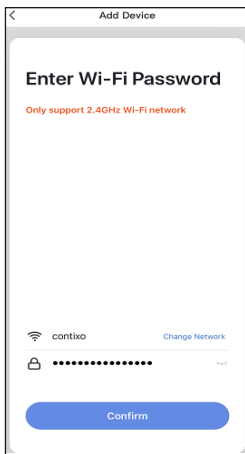

Detecting Device

When detecting devices manually, power on the device and confirm you hear the "Didi" sound. Once you confirm the smart device is ready, press the "nest step" button. Continue on to the next step. Pressing the "Help" button will offer some troubleshooting guidelines to follow.

Connect to a WiFi Network

Next step to connect the smart device is to connect to a WiFi network.
If the proper network is not listed on this page, select the "Change Network"
link to see a list of available networks. Enter the password next to the lock icon.
Press "Confirm" to continue .

Scan with Camera Screens

The pairing process will ask for your to use the doorbell to scan a QR barcode on the screen.
Press "Continue" to begin.

The QR barcode will appear on the screen.

Hold doorbell camera in front of the QR barcode until you hear a beep.

Press the "Heard the beep" button to continue.

Pressing the "Heard nothing at all" will provide some trouble shooting steps to help get doorbell to scan the QR barcode.
Connecting

After you hear the beep and continue on, the "Connecting" screen will appear. It will usually register within by approximately 30% range. The Device found will checkmark green, then Initializing device will complete. After connecting process completes it will continue on toward the next screen.
Confirmation Screen

The smart device is added once they are communicating on the same network. You can rename the smart device by clicking on the pencil icon. You can specify the location. Press the "Completed" button at the bottom of screen to continue to next step.
Home Screen Updated

Now that your device has been added, it will show on the home screen along with all other paired Xodo Smart Products. Now you are all set.

Camera Home Screen

The home screen will show the live camera feed along with camera controls.
1. Press the "Screenshot" button to take a snapshot.
2. Press the "Speak" button to communicate with people next to the smart doorbell.
3. Press the "Record" button to record video.
4. "Playback" will access stored video from the memory card.
5. Press the "Alarm" button to switch on/off the Motion detection alarm function.
6. "Cloud storage" allows to view your record in cloud storage.

Configure The Camera Settings

Different features can be adjusted from the menu button on the upper right hand button "⟋" on the APP.
1. Device Name can be changed as desired.
2. Add Members to be able to control the device in the Share Device setting.
3. Device Information provide network configuration information.
4. Use Echo provide the information about how to connect your device to Amazon Alexa.
5. Basic function settings can set below functions: Flip Screen: on/off; Talk Mode: One-Way Talk/ Two-Way Talk.
6. Motion detection on/off switch control if the motion sensor is on. Having the motion sensor on will alert the smart device each time there is movement.
7. Memory Card settings will display info regarding the removeable memory module.
8. Firmware Information allows to check software or install updates to device.
9. Remove device will remove the doorbell from the Xodo Smart app and remove pairing. This is necessary if pairing with a new device.
# Link Xodo Smart account to Google Home Screen

1. Open Google Play Store or Apple Store and download Google Home
2. Open the Google Home app. Click on Get Started.
3. Login with a Google Account or create a new account.

4. Use Location access to find devices on the same wifi network.
5. You will need to permission so Google Home can access device.
6. The app will search for devices to connect.

7. If no devices can be found that are already setup, select NO.
8. A youtube video is available to help instruct how to use smart devices.
9. The app will show settings to add devices, setup routines, and adjust settings.

10. If the devices are already installed and setup through the Xodo app, you can select the "Works with Google" setup option to continue.

11. Configure the home settings by adding address and name to a "Home" group.

Control your smart devices through Google Home

Now you can control your smart devices through Google Home. Take bedroom light as the example, the supported voice commands are as below:
1. Ok Google, turn on/off bedroom light.
2. Ok Google, set bedroom light to 50 percent.
3. Ok Google, brighten bedroom light.
4. Ok Google, dim bedroom light.
5. Ok Google, set bedroom light to red.
Link Xodo Smart account to Alexa

1. Download the free Alexa app from the Amazon Appstore, Google Play, or the Apple App Store.
2. Open Alexa app to home screen
3. In upper left hand corner open the menu.
4. Next click on "Skills & Games"
5. In top of app you can now search for "Smart Life"
6. Smart Life App will appear.

7. Open the smart life app to add
8. Click Settings
9. Manage Smart Home Devices to verify Smart Life has been added.

10. You will be redirected to the account link page. Type in your Xodo Smart account and password, don't forget to select the country/region where your account belongs to. Then tap "Link Now" to link your Xodo Smart account. The country/region, the account, and the password must match.
