# Use and Care Instructions

## wedi® Drain Covers & Drain Cover Frame

- In the event of accidental use or spillage of unsuitable cleaning agents, immediately rinse thoroughly with clear water
- Rough mechanical contact and the use of aggressive cleaning agents must be avoided – Instructions provided by the detergent manufacturer must be followed
- To avoid limescale stains, gently rub the surfaces dry with a soft, clean cotton cloth after cleaning
- Fingerprints can be removed with a soft microfibre cloth (included)
- Cleaners should not be sprayed directly onto the surface
- Dirt such as sand and soap residue can be removed with water-based cleaners

### Suitable cleaning agents

- Chloride-free glass cleaners
- Soft cotton cloths
- Iron-free sponges
- Natural leather (window leather), artificial leather
- Microfibre cloths

### Unsuitable cleaning agents

- Bleach, baking powder, silver cleaning agents, scouring milk, scouring powder
- Cleaning agents containing chloride, acid or salt
- Limescale dissolver
- Drain cleaner
- Abrasive and sharp-edged cleaning utensils such as cleaning pads, knives, scrapers, steel wool, scouring pads, steel brushes
- Any cleaning utensil previously used for other steel products

### Attention:

Always clean or wipe brushed surfaces in the direction of the sanding!

Due to the manufacturing process, the nature of the material and the light conditions, there may be slight color deviations on PVD and Cerakote surfaces.
