

### Assembly:

To install, you will need the following:

- Pencil and tape measure
- Phillips head screw driver if needed and pliers.
- Electric drill with assorted bits

### Parts:

- Main unit (See Photo – A)
- Package of ceiling hooks (See Photo – B)
- 4 packs of PR-41202 ceiling links and a pack of pan hooks PR-41205 (See Photo - C)

Photo A - Fully Assembled

Please consult with your local hardware store if you have any questions or concerns about the construction of your walls or ceilings. They can assist you in selecting the proper hardware and procedures. The generic hardware provided will work for most applications. Always measure twice before drilling. **NOTE:** If you have any doubt about your installation or your ceilings ability to offer the proper support for your pot rack, please contact a professional.

### Mounting Directions:

Determine where ceiling joist (beams, studs) are located. Place ceiling hooks so that the hanging links will hang straight down from the ceiling. It is important the ceiling hooks are secure within the joists so they will bear the weight of the rack and any cookware. Proper installation diagram (See Photo – D)
