

CODE-COMPLIANT

# STRUCTURAL SCREWS

CAMO® offers a full line of high-performing, code compliant structural screws for all your deck, framing, and general construction needs. They are engineered to start fast, drive smooth, and hold strong. No pre-drilling required.

## PROTECH® ULTRA 4 COATING INDUSTRY LEADING COATING SYSTEM

Our proprietary PROTECH Ultra 4 four-layer coating system protects your connections against the harshest environmental elements. Each layer works together to provide optimum corrosion resistance, UV and environmental protection, and torque reduction for a high-performing, long-lasting screw. Tested in accordance with ASTM G198, the coating meets or exceeds the protection of code-approved hot-dip galvanized (ASTM A153, Class D), in ground contact general use pressure treated lumber (AWPA UC1-UC4A).

**LAB TESTED**  
**HIGHEST**  
**RATED COATING**

Our coating is tested 2X longer than industry standard - so you can be confident your connections will last.

LEARN MORE ABOUT OUR STRUCTURAL SCREWS.

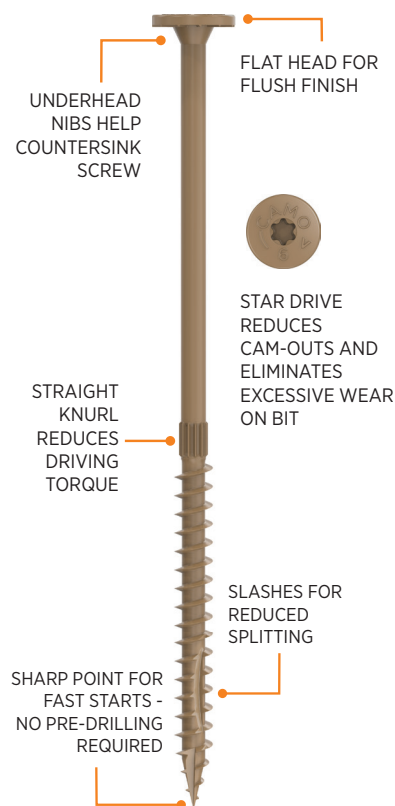

**CODE COMPLIANT.**  
**THIRD-PARTY TESTED.**  
**DRJ CERTIFIED.**

**IRC/IBC**
