

Van Zyverden's **ROSES TOUCH OF CLASS**

Roses are among America's favorite flowers and makes for a sturdy flowering shrub which will return for years to come. Each year growing larger and more beautiful then the prior year. Today's roses are easy to grow, mostly fragrant, hardy and naturally disease resistant. Through our network of top professional breeders we are able to offer you a selection of exceptional roses. Planting roses is fun and a rewarding way to invest in your garden for years to come.

*Repeat blooms later
in the season*

All-America Rose Selection

Light tea fragrance

About This Variety: Touch of Class, a hybrid tea All-America rose, is one of the top-rated exhibition roses of all time. The large beautifully formed flowers slowly spiral open in distinctive swirls of blended cream and pink to finish warm coral. Excellent choice for cutting. Bushy and producing abundant flowers. Repeat blooms later in the season. Makes for an excellent cut flower.

Growing Instructions: 1- Select a well-drained location away from trees and hedges where there is sun at least half a day. 2 - Prepare the site by digging a hole 12" to 15" deep and about the same depth. If available add 6-8" of compost, manure or top soil. 3 - Best to plant immediately upon arrival. Remove package and soak the bush in water for about an hour. Prune the canes back to about 1" above the bud union. Then spread the roots out evenly into the prepared hole. Plant at a depth whereby the bud union (where the branches come together) will be about 1" above the soil level after back filling the hole. 4 - Best to mound soil or mulch over the bud union until the danger of frost has passed, removing it once new growth is observed. 5 - Soak soil every week until it gets established when rain fall is deficient. 6 - Fertilize with a season-long balanced fertilizer once leaves start to emerge.

Care Tip: Pruning off an inch or so off the canes will help send a message to the rose that it is time to start growing once again.

Exposure: Full sun to partial shade

Height: Grows 48-72" tall

Spacing: Plant 36" apart, bud union should be 1" above ground level

Hardy in: USDA zones 5-9

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
