**WARNING:** Read and follow these instructions carefully and be mindful of all warnings shown throughout.

# READ AND SAVE THESE INSTRUCTIONS

## **WARNING : TO REDUCE THE RISK OF FIRE, ELECTRICAL SHOCK, OR INJURY TO PERSONS, PLEASE OBSERVE THE FOLLOWING:**

- 1.] To ensure success of installation, be sure read these instructions and review the diagrams thoroughly before beginning.
- 2.] **To avoid possible electric shock, be sure electricity is turned off at the main power box before wiring.**  
All electrical connections must be made in accordance with local codes, ordinances and/or the National Electrical Code. If you are unfamiliar with the methods of installing electrical wiring and products, secure the services of a qualified and licensed electrician as well as someone who can check the strength of the supportive ceiling members and make the proper installations and connections.
- 3.] Make sure that your installation site will not allow rotating fan blades to come into contact with any object. Blades should be at least 7 feet from the floor when fan is in operation.
- 4.] If possible, mount ceiling fan on a ceiling joist - the joist must be able to support the motion and weight of the moving fan. If the fan will be mounted on a ceiling outlet box, a 4" x 2 1/8" deep METAL octagon box is required; one UL listed as "suitable for fan support". The box and its supporting members must not be able to twist or work loose. **DO NOT USE PLASTIC BOXES.** Installation on a concrete ceiling should be performed by qualified personnel.
- 5.] Blades should be attached after motor housing is hung and in place. Fan motor housing should be kept in carton until ready to be installed to protect its finish. If you are installing more than one ceiling fan, make sure that you do not mix fan blade sets.
- 6.] After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box and the "HOT" wires on the other side.
- 7.] Electrical diagrams are for reference only. Light kits that are not packed with the fan must be UL/ETL listed and should be installed per the light kit's installation instructions.
- 8.] After fan is completely installed, check to make sure that all connections are secure to prevent fan from falling and/or causing damage or injury.
- 9.] The fan can be made to work immediately after installation. The bearings are adequately charged with grease, so that, under normal conditions, further lubrication should not be necessary.
- 10.] The fan must be turned off and stopped before reversing fan direction.
- 11.] This fan is suitable for sloped ceiling.
- 12.] This fan is electrically reversible.
- 13.] This fan includes an integrated light kit.
- 14.] This fan is controlled by remote control.
- 15.] This fan is suitable for indoor use.

**Unpack and inspect fan carefully to be certain all contents are included.**

### Hardware Bag

#### For Mounting Bracket:

Flat Washer x2  
Star Washer x2  
Spring Washer x2  
Machine Screw x2  
Wood Screw x2

#### For Wire Connection

Wire Nut x3

#### For Blade Installation

Blade Screw x12 +1  
Blade Flat Washer x12 +1  
Blade Paper Washer x12 +1

**WARNING: blades should be at least 7 feet from floor**

#### Note 1:

Turn off power at breaker box to avoid possible electrical shock.

#### Note 2:

Use metal outlet box suitable for fan support. Outlet box must support 35 lbs min.

## 1. HANGING SYSTEM INSTALLATION

### 1A. Installing mounting bracket to ceiling outlet box

Install mounting bracket to outlet box in ceiling by using screws included with the outlet box and washers from the hardware bag.

### 1B. Installing Downrod and Yoke

Place motor right side up onto styrofoam packing

- ① Remove cross pin, washer and cotter pin from downrod.
- ② Insert downrod through canopy and yoke cover, and feed motor wires through downrod.
- ③ Loosen 2 downrod jam screws at yoke. Insert downrod assembly into yoke.
- ④ Insert the cross pin through yoke & downrod and secure with washer and cotter pin.
- ⑤ Tighten both downrod jam screws to further secure downrod.

### 1C. Hanging the fan

Lift fan assembly onto the mounting bracket.

Rotate the fan so that the groove on the ball engages the ridge on the mounting bracket.

## 2. WIRING CONNECTION

### 2A. Insert receiver into mounting bracket

Note: Do not squeeze all the wires while inserting the receiver into the mounting bracket.

### 2B. Making electrical wire connections

Follow separate instructions enclosed with the remote control.

### 3. CANOPY INSTALLATION

#### 3. Installing the canopy

Note: Two screws are pre-installed on mounting bracket for canopy installation. You will need to remove one and loosen the other slightly.

- ① Push up canopy until the screw still in the mounting bracket is engaged with the large end of the keyhole on canopy.
- ② Rotate canopy slightly until the screw head is engaged in the narrow end of the key hole.
- ③ Insert the remaining canopy screw into the other hole, and tighten both canopy screws.

### 4. BLADE INSTALLATION

#### 4. Installing the blades

- ① Align three holes in blade with the three posts on blade arm and secure with blade screws and washers. Repeat for remaining blades.

### 5. LIGHT COVER INSTALLATION

*If you are installing without the light, proceed to Step 6A on next page.*

*If you are installing with the light...*

#### 5. Installing the Light Cover

- ① Lift light cover to motor aligning the opening of the grooves to the nibs inside the lower plate.

- ② Rotate cover clockwise to secure it to motor assembly.

## 6A. OPTIONAL NO LIGHT DIS-ASSEMBLY

***If you are not installing the light, The LED Light Pan must be removed***

### 5. Removing the LED Light Pan

- ① Remove the three screws holding the clear cover to the LED array.
- ② Unplug the wire connector from the LED array.
- ③ Remove the three screws holding the Light Pan to the motor plate.
- ④ Remove Light Pan

## 6B. NON-LIGHT COVER INSTALLATION

***If you are not installing the light...***

### 6B. Installing the Non-Light Cover

- ① Lift light cover to motor aligning the opening of the grooves to the bent tabs on motor plate.

- ② Rotate cover clockwise to secure it to motor assembly.

## 7. REMOTE SETTING

### 7. Setting the Remote Control

Follow the separate instructions enclosed with the remote control.  
This fan model has an optional integrated dimmable LED array;  
Use the "D" dimming setting for the Light Function Select Switch.

**INSTALLATION IS COMPLETE**
