

# CARE TIPS AND GENERAL INFO FOR:

## CELOSIA

---

### EXPOSURE:

FULL SUN

Partial shade is also okay, but Celosia prefers the sun and can take the heat!

### POLLINATOR:

ATTRACTS BEES, BIRDS  
& BUTTERFLIES

### BLOOMTIME:

SUMMER-FROST

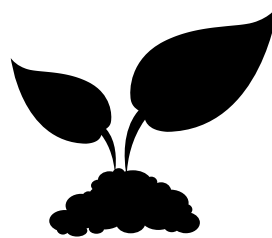

Super easy to grow with a tolerance to heat and dry. Trimming back and dead heading will help prolong flower power.

### WATERING NEEDS:

Celosia prefers soil to dry out between waterings. 1-2x a week should be sufficient.

### SOIL TYPE:

RICH, WELL DRAINING SOILS. Celosia does not like wet feet. Make sure the soil has ample draining.

### FERTILIZER:

USE A LIQUID SOLUBLE FERTILIZER 2x/MONTH
