## A LETTER TO MY PRECIOUS CUSTOMER

Dear Customer,

Thanks for choosing us! If you have any issues when you receive it, please contact us directly . We will offer a proper solution once we receive your message. Basically, we provide online customer service during PDT 6:00pm~9:00pm (EDT 9:00pm~00:00am) from Monday to Friday. So, do not hesitate to contact us during this time frame, we will reply to you in 30 mins!

- **Customer Support Team**

## INSTALLATION STEPS

1. Secure the bracket onto the junction box with the screws. If there is no junction box, you need to drill 2 x 6MM holes in the wall, and then insert anchors and finally secure the bracket onto the anchors by the screw bolts.
2. Hardwired Way – Use the orange wire connectors to connect the 'L' wire to the Live Wire, the 'N' wire to the Neutral Wire, and the Bare Copper Wire needs to be wrapped around the green screw.
3. Use the original screw nuts to secure the canopy. You can adjust the extended height of the screw bolts on the bracket if they extend out the canopy too long or too short.

## QUESTION & ANSWER

Q: My lamp doesn't work, what can I do?

1. Please check whether the lamp is really powered on and the switch is on.
2. Please make sure the bulbs are working well.
3. Please check whether the copper pieces inside the bulb sockets contact well with your bulbs.

None of these 3 steps? Just feel free to contact us for a replacement.
