

Cupola Installation Instructions

1. The base of the cupola is designed and molded with a 3/12", 4/12" and 5/12" pitch*. Simply cut the desired pitch and fasten cupola base to your roof using appropriate fasteners for your roof type (Ask your local home or hardware store for recommendations on fastener type) (recommended four screws per side). Fasteners for attaching to your roof not included.
2. Place the cupola roof on the base and fasten using the included fasteners (recommended two per side).
3. Attach directional, wind cups and ornament on top of the weather vane mast. Next install weather vane by threading the mast into the top of the cupola. Cupola has molded in threads to make installation of weathervane easy.

*Base can be cut up to an 8/12" pitch if necessary.
