EPIC
SPECIFIC REPELLENTS FOR
SPECIFIC PESTS

**IGUANA
SCRAM™**

GRANULAR REPELLENT

EASY TO APPLY INSTRUCTIONS

FLOWER BEDS, SHRUBS, GARDENS:

Sprinkle by shaking the jug to form a border approximately 15 to 18 inches out from the edge of the bed with a 20-24 inch band of Iguana Scram.

Apply so it is visibly heavy enough to see. Sprinkle around tree bases to keep iguana's from climbing tree to get to any vegetation.

FOR EXCESSIVE PROBLEMS IN HIGH IGUANA DENSITY AREAS:

Initial Application: Apply as above and **Add** a second band **15 inches out from the first strip** around the bed and broadcast Iguana Scram lightly throughout the inside of the bed. This will stop the problem and only a single band nearest the bed will be needed thereafter for maintenance applications going forward.

SCRAM COVERAGE

When used as directed the treated area will cover the square feet listed & give you the desired results! EPIC stands behind all our granular repellents with the industry's best **100% PERFORMANCE GUARANTEE!** For detailed information, visit our website at **epicrepellents.com**
