

# Jerith®

## Why Professional Grade?

**Jerith fence is engineered to be strong and durable using a better aluminum alloy!**

Jerith's exclusive HS-35™ aluminum alloy is stronger than both imported and domestically produced fences that use standard 6063 alloys. The rectangular shaped 1" x 5/8" pickets are larger and more durable than standard 5/8" square pickets.

The FencCoat™ paint finish is guaranteed not to crack or peel making Jerith fence maintenance-free without the rust. Jerith created the first ornamental aluminum fence over 50 years ago and our products are still made 100% in the USA and carry a Lifetime Warranty!
