Installation Specifications

*30" minimum clearance between the top of the cooking surface and the bottom of an unprotected wood or metal cabinet; or If no 30" minimum clearance, 24" minimum when the bottom of the wood or metal cabinet is protected by not less than 0.25" flame-retardant millboard covered with not less than no. 28 MSG sheet steel, 0.015" stainless steel, 0.024" aluminum, or 0.020" copper.

**15" minimum between the countertop and the adjacent cabinet bottom.

IMPORTANT: To eliminate the risk of burns or fire caused by reaching over heated surface units, cabinet storage space located above the surface units should be avoided. If cabinet storage is to be provided, the risk can be reduced by installing a range hood that projects horizontally a minimum of 5" beyond the bottom of the cabinets.

A: Required Cabinet Opening is 30"
B: Acceptable Electrical Outlet Space
