

VanZyverden's
DAFFODIL APRICOT WHIRL

Daffodils (botanically called *Narcissus*) are long term perennials and make for great companions to not only other bulbs, but also annuals, perennials and all sorts of shrubs. They soften hardscapes, accent most any garden and are an inexpensive solution to adding color to your garden on nearly any budget. They are relatively pest free and deer will not eat them. Daffodil classifications become quite technical, as they are divided into 13 divisions according to their flower shape and heritage by the American Daffodil Society. They do well throughout most of the U.S. as long as there is a discernible winter. Daffodils are ideal for large plantings and naturalizing, making them an exceptional value item and providing years of carefree color.

*Long-lasting, huge
ruffled and frilled blooms*

Deer resistant

Years of carefree color

About This Variety: Apricot Whirl is a split cup Narcissus variety. Its frilled and ruffled petals, which resemble a butterfly, set it apart from others. It is quite unusual in both color, shape and a real stand out. It has orchid like blossoms.

Growing Instructions: In fall, plant the bulbs deep in fertile soil with the pointy end up in an area with full sun to partial shade. These bulbs do not like wet feet. Water during their growth period. Fertilization helps growth and natural increase by offsets. Daffodils can be left undisturbed to naturalize for years. If you cannot plant them immediately, store in a cool, airy place.

Care Tip: When given ample sunlight, water, proper nutrition, they will return for years to come with little other efforts. Remove the flowers after they bloom and allow the leaves to brown before removing.

Exposure: Full Sun to Partial Shade

Height: Grows 12-14" tall

Spacing: Plant 8" apart, 6" deep

USDA Zones: hardy in USDA zones 3-8

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
