

Give your laminate floor a stunning finish

4-in-1 Multifunctional Moulding

One room generally requires more than one transition so our 4-in-1 multifunctional moulding kit provides enough moulding for two room transitions. This simple color-coordinated moulding works four ways, saving you time and money.

1.

T-Moulding

Connects two floors of equal height.

2.

Hard Surface Reducer

Connects two hard surface floors of different heights.

3.

Carpet Transition

Transitions between hard surface floor and carpet.

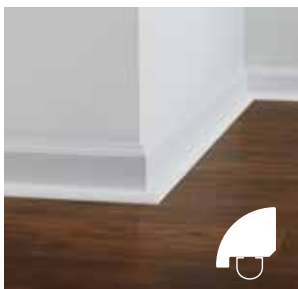

4.

End Moulding

Finishes a hard surface floor against fireplaces, sliding doors, and more.

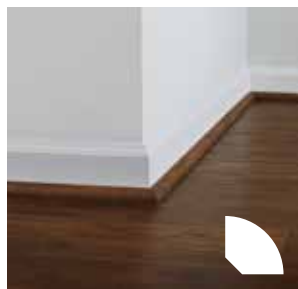

More finishing solutions
