

# CALI<sup>®</sup> vinyl classic

## Timeless Beauty. Uncompromising Strength.

CALI presents the next generation of Cali Vinyl<sup>®</sup>, remastered for extreme commercial grade durability. Cali Vinyl Pro is special forces flooring made for the professional who demands domineering strength, faster installations, and 100% waterproofing. A fortifying GeoCore<sup>®</sup> layer delivers next-level toughness, allowing for zero acclimation and a stronger, faster locking system. Flooring installs in half the time of other luxury vinyl planks and is shielded by an extra thick 20mil industrial-grade wear layer. Not one to sacrifice beauty for brawn, Cali Vinyl Pro features the most realistic wood grain colors, details, and textures, with twice as many unique planks for an authentic hardwood look and feel.

## Available Colors

**Leaner & Meaner**

Designed with the commercial installer in mind, this ultra strong drop-lock system is easier to snap together, meaning flooring can be laid in half the time.

**GeoCore: Bad to the Bone**

This backbone of limestone composite resists indentation and delivers 50% better dimensional stability (less expansion and contraction), meaning no transition pieces are required.

**Fear No Moisture**

A more muscular construction translates to 100% waterproof flooring over any type of subfloor, and zero acclimation even in below-grade installations.

**Strong is Beautiful**

Improved HiFi Imaging technology delivers richer colors and even more intricate detail, from distressed grays to warmer browns and deep exotic grains.
