Thank you for purchasing our products.
Attention: for your safety, please entrust
a professional person to install

- (1) : all power supply shall not exceed the specified range (rated voltage AC220V/AC110v, 50Hz, Support global voltage standard, can convert your country's standard voltage)
- (2) : do not install lamps in the unstable ceiling or open air;
- (3) : do not install lamps above high temperature objects or wet places;
- (4) : in order to ensure safety, if there is any problem with lamps, please entrust professional personnel to carry out maintenance;

Installation steps:

- (1) : before installation, the whole lamp shall be tested for lighting, and the appearance of the lamp shall be checked for damage (2) : fix the arched hanging board on the ceiling with expansion screws;
- (3) : when installing, please wear gloves to avoid damaging the surface of lamp body;
- (4) : take down the test wire outside the terminal block of the lamp body and connect it to the main line;

(L-live; N-null; \perp -earth)

- (5):Lock the lamp body with screws and bow hanging plate (with a magnetic cross screwdriver)
- (6):Please use the remote control according to another manual.

Please try to light up before installing

Before installing the lamp, please check whether the circuit is falling off or in poor contact. Please connect the wire first, and then power on for testing. After power on for testing, check if it is in good condition and then install it.

Turn on the controller, then you will hear a sound "Di". Press "FAN" within 2 minutes till you hear the sound "Di Di". Check code is done. If not, turn off the controller, and repeat it after 1 minute.

IF THE REMOTE CONTROL CANNOT BE EFFECTIVELY CONTROLLED, PLEASE CHECK THE BATTERY, AND REMOVE THE BATTERY IF NOT IN USE FOR A LONG TIME.

Matters needing attention:

- 1.Receiver can not be mounted on the plane to avoid affecting the unevenness of the cover and ceiling.

2.Receiver sub-inputs and outputs are strictly prohibited from adjusting input and output pairs.

3.The working voltage of this product: **AC 180-265V**

4.If there is a wall switch on the fan,it must be on to control effectively.

5.Wiring should be done according to the color of the wire and the instructions on the sleeve.

6.When using the remote control,please check whether the battery is installed or not.Pay attention to the positive and negative poles of the battery.The control key of the handle flashes every key that is pressed

6. Authorized certification

7.Thanks again

My friend, the weather can be very hot sometimes.
When you go out, you should pay attention to
heatstroke prevention. I wish you and your
family a happy day.If you have any questions,
you can consult us. We are very happy to
hear your voice.
