

CITYPOST

SIMPLE • AFFORDABLE

Ordering Guide

ABOUT CITYPOST

It has been said that necessity is the mother of innovation, and that is certainly true about CityPost. CityPost was founded when three friends with backgrounds in engineering, construction, and product development were trying to find a simple cable railing system that would fit into their budget while building spec homes. After searching the internet and talking with dozens of construction suppliers they were unable to find what they were looking for, so they decided to create it themselves. By standardizing on the highest quality components coupled with a patented top rail bracket, CityPost has quickly become the most simple and affordable cable railing system available in the market today. With the ability to choose the desired railing length, height, color, and mounting type the CityPost cable railing system provides nearly infinite flexibility to meet the needs of even the most complicated project.

HOW TO USE THIS GUIDE

Are you installing near salt water?

If installing within five miles of saltwater, contact vendor directly for marine grade options. Reach out at 855-GET-CITY or visit WWW.CITYPOST.COM.

STEP 1: SELECT YOUR RAILING MOUNT

BASE MOUNT

FASCIA MOUNT

FASCIA STAIRS

STEP 2: SELECT YOUR RAILING HEIGHT

36 INCHES

42 INCHES

Remember: Always check with your local code for railing requirements.

STEP 3: SELECT YOUR RAILING ORIENTATION

HORIZONTAL

STAIRS

STEP 4: SELECT YOUR RAILING COLOR

BLACK

BRONZE

GREY

WHITE

STEP 5: MEASURE YOUR PROJECT

Measure each side of your deck. For each side/section you will order one kit. Each kit will include enough posts, hardware to cover one section.

You will be able to customize to your exact length since you will cut the cable on site and the top rail can be cut down as well as be extended using the connecting sleeves we provide for any kit over 6'.

- A** 12 Foot Deck Cable Railing
(Order 12' kit in corresponding mounting type /color you desire)
- B** 12 Foot Deck Cable Railing
(Order 12' kit in corresponding mounting type /color you desire)
- C** 4 Foot Deck Cable Railing
(Order 6' kit in corresponding mounting type /color you desire)
- D** 9 Foot Deck Cable Railing
(Order 10' kit in corresponding mounting type /color you desire)
- E** 8 Foot Stair Cable Railing
(Order 8' kit in corresponding mounting type /color you desire)
- F** 90 Degree Corner Sleeve (2)
- G** 90 Degree Deck-to-Stair Sleeve (2)

NOTE: The 6' kit is the only two post kit and will service any section 6' or less.

If installing within five miles of salt-water, contact vendor directly for marine grade options at 855-GET-CITY.

STEP 6: SELECT YOUR MODEL NUMBERS

After you’ve measured your project, determined your sleeves, selected your height, and chosen your color, you are ready to find your model numbers and place your order with Lowe’s. The next pages will provide you with our entire catalog. Simply find your model numbers and add them to your online cart or order at the Lowe’s Pro Center. Note, swaging tool and cable cutter not included. Not recommended within three miles of salt water (order stainless steel post option in that case).

STEP 7: SELECT YOUR ACCESSORIES

After you have added your CityPost kits to your cart you may need to order some additional items. Pages 16-18 in this catalog provide the item numbers for our kit accessories.

FREQUENTLY ASKED QUESTIONS

What do I get in the kit?

Each kit that you purchase will come disassembled with all of the hardware, top rail pieces and enough posts to where you will not have to spread them more than 6’ apart. As long as you order one kit for each side of your deck, and the cable cutter and swaging tool, you should not have to purchase any thing else to complete the job.

How many posts do I need?

Because the posts can be spread to a maximum of 6’ on center, we will always send enough posts for each kit to where they should never be spread more than 6’ apart. For example, both an 8’ a 10’ and a 12’ kit would all come with 3 posts to avoid a post spread of over 6’. But a 14’ kit would come with 4 posts.

Can I customize to an exact length like 13’ 5”?

Yes, you cut the cable yourself on site to the exact length. Also, the top rail comes in 6’ long pieces made from aluminum which cuts easily. For any kit over 6’ we include connecting sleeves so you can cut and/or connect the top rail to make an exact length. If you had a 14’ section, you would take each 6’ piece and cut them to 4’9” and then connect them with the included sleeves to make an exact 14’ section. Every middle post will have a top rail connecting sleeve over the post.

How should I order if I live near salt water?

If installing within five miles of saltwater, contact vendor directly for marine grade options. Reach out at 855-GET-CITY or visit www.citypost.com.

Corner Posts

HOW CORNERS WORK

Provided you order one kit for each side of your deck, you will have enough posts and hardware to do a standard double corner post. The only item you would need to add is a corner sleeve. If you prefer to use a single post in the corner, add the corresponding item number to the order.

EXAMPLE:
Base Standard Double
Post Corner

(Terminated cables)
