

PRECISION DETECTION

PRODUCT DETAILS

Johnson's green and red line laser detector was designed for use indoor and outdoor and greatly expands the working range of line lasers. The IP54 rating means it's built to withstand the rigors of construction sites while the dual-sided LED backlit display make readings easy. The quick-connect clamp with an integrated vial simplifies positioning, while the vertical micro-adjust allows for precision alignment. The rare-earth magnets enable rapid mounting on ferrous surfaces, adding to the versatility of this indispensable tool.
