# SIMPLY THE BEST FIT

PRO-FIT® provides fastener solutions for every residential construction need. Framing to Finish, and everything in between. Whether you need collated fasteners for your pneumatic nailer, or specialty spikes and fence staples, PRO-FIT has you covered. We offer convenient 1lb and 5lb job boxes and 25lb and 50lb bulk fasteners.

PRO-FIT merchandising and color-coding helps customers find what they need quickly, while smaller master counts make for efficiently run inventories. Our global supply chain experts ensure availability with 98+% fill rates, so you always have what you need.

## NAILS

FRAMING	For interior and exterior general construction.
FINISH	For trim and fine finishing work where a smaller, less visible head is desired.
ROOFING	For applying roofing asphalt shingles, insulation board, and felt to wood substrates.
SPECIALTY	A collection of fastener solutions that fulfill unique requirements for specific applications.
MASONRY	Designed to be driven into concrete or mortar.
STAPLES	For joining wire fencing to wooden posts.
DECKING	For deck construction and a wide variety of exterior applications.
SIDING	For applying wood lap siding.
CAPS	For securing roofing felt or housewrap.

## COATING

STAINLESS	300 Series Stainless is recommended for exterior applications where a high level of corrosion resistance is desired.
GALVANIZED	For exterior applications to protect against corrosion resistance.
BRITE	Miscellaneous category; Includes Brite, Heat Treated, Phosphate Coated, and Vinyl Coated.

## SCREWS

DECKING	For decking and wood-to-wood construction.
DRYWALL	For attaching drywall to wood or metal studs.
MULTI-PURPOSE	For general construction, wood-to-wood fastening, and installing cabinets, drawer glides and other interior applications.
SPECIALTY	A collection of fastener solutions that fulfill unique requirements for specific applications.

## COATING

CERAMIC	Applied as a protective film on metal to protect against temperatures above 110°C; highly resistant to corrosive compounds.
SILVER OR YELLOW ZINC	Silver chromate or yellow dichromate plating applied as a sealer over zinc that offers a modest amount of corrosion resistance.
PHOSPHATE	Used to reduce friction during installation and increase corrosion protection but are not recommended for exterior application.
HOT DIPPED GALVANIZED	For exterior applications to protect against corrosion resistance.

## COLLATED FASTENERS

## FRAMING

Framing nails are vinyl coated and are used in building walls, roofs, applying sheathing, sub-flooring, and almost anywhere construction lumber is used.

<b>30° PAPER STRIP</b> <ul style="list-style-type: none"><li>Fits most 30-34° Framing Nailers</li><li>Available in Smooth and Round Shank</li><li>Available in Brite, Galvanized, and Stainless Steel</li></ul>	<b>21° PLASTIC STRIP</b> <ul style="list-style-type: none"><li>Fits most 20-22° Framing Nailers</li><li>Available in Smooth, Drive, and Ring Shank</li><li>Available in Brite, Galvanized, and Stainless Steel</li></ul>
