

IRWIN® VISE-GRIP®

9.5 IN. HIGH LEVERAGE LINEMAN'S PLIERS WITH POWERSLOT™ TECHNOLOGY

The IRWIN® VISE-GRIP® PowerSlot™ High Leverage Pliers feature a curved slot design, which provides 50% reduced cutting effort* when making a cut. Traditional high-leverage pliers have a trade-off between cutting force and handspan, but this technology minimizes that trade off.

Complementing this high leverage design, the pliers feature 60CrV Steel, high-tech laser hardened cutting edges, and corrosion resistance, offering a balance of high performance, durability, and cutting power.

ELECTROPHORETIC COATING
FOR SUPERIOR CORROSION RESISTANCE†

60CrV STEEL
FOR MAXIMUM STRENGTH

POWERSLOT™ DESIGN
FOR REDUCED CUTTING EFFORT*

LASER HARDENED
FOR DURABLE CUTTING EDGES

FISH TAPE PULLER
FOR ADDED FUNCTIONALITY

BI-MATERIAL 3-SHOT GRIPS
FOR COMFORT AND CONTROL
