

Standard Lockers – 63000 Series Triple Tier Installation Instructions

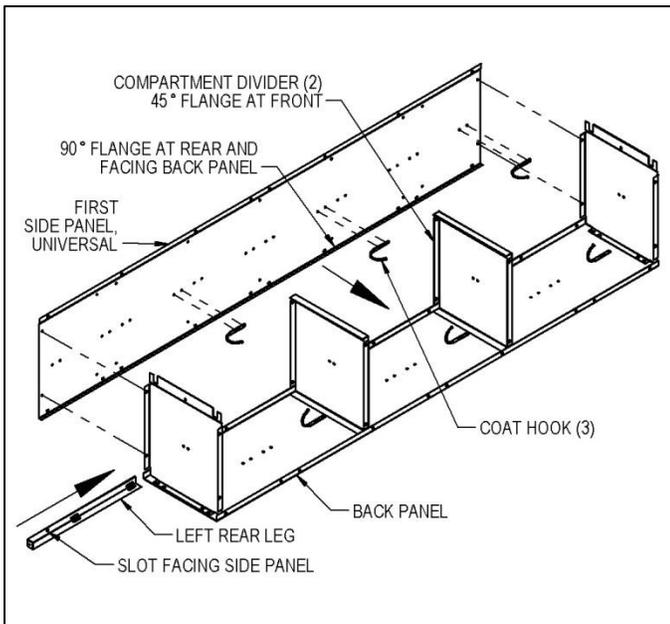

Thank you for selecting Salsbury's standard triple tier lockers. These instructions are intended to assist you in assembling the lockers. Note that a 6 feet high locker is shown. Hole locations on the 5 feet high locker are different. Assembly of the various locker components will be with #10 - 24 x 3/8" long slot less screws and #10 nuts (provided). Loosely fasten a screw and a nut into every set of mating holes with the screw heads positioned on the outside of the locker or on the exposed surface.

One Wide Locker Assembly

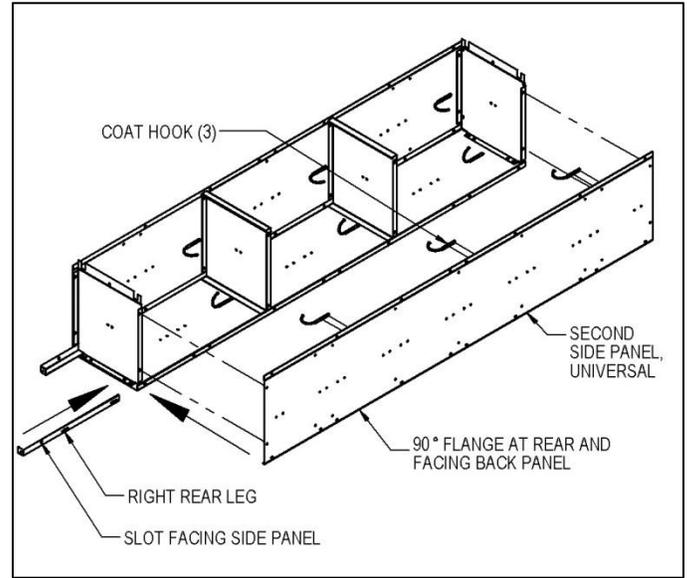

Step 1: Attach the top shelf, bottom shelf, and three coat hooks to the back panel.

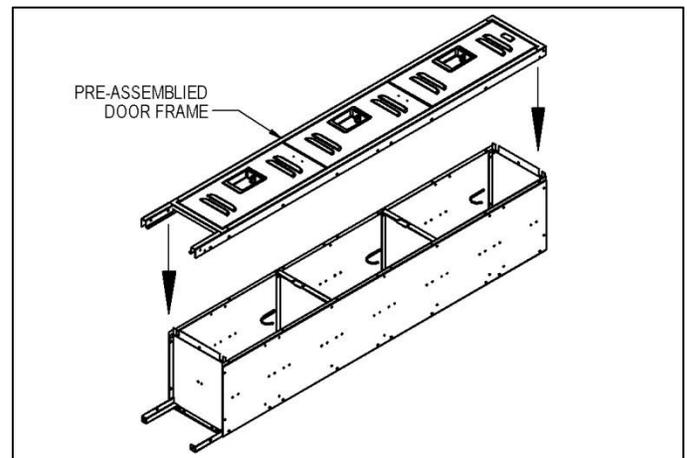

Step 2: Turn the back panel on its back with the shelves pointing upward. Attach the first side panel, the left rear leg, and two compartment dividers to the assembly from Step 1. Attach an additional three coat hooks to the first side panel.

Step 3: Attach the second side panel and the right rear leg to the assembly of Step 2. Attach an additional three coat hooks to the second side panel. The locker chassis is now complete.

Step 4: Attach the pre-assembled door frame onto the assembly of Step 3.

Step 5: Tighten all fasteners checking for squareness of the locker while tightening. Attach optional sloping hood, end bases or front base (see pages 4 and 5).

Step 6: Place the locker in the installed location and anchor to the floor, wall, or to both. Individual job conditions will dictate the type of fastening anchors to use (not provided).

Step 7: Fasten all lockers in a row together by installing fasteners provided through the side panels. Installation is now complete.

Three Wide Locker Assembly

Step 1: Attach a top shelf, a bottom shelf, and three coat hooks to a back panel.

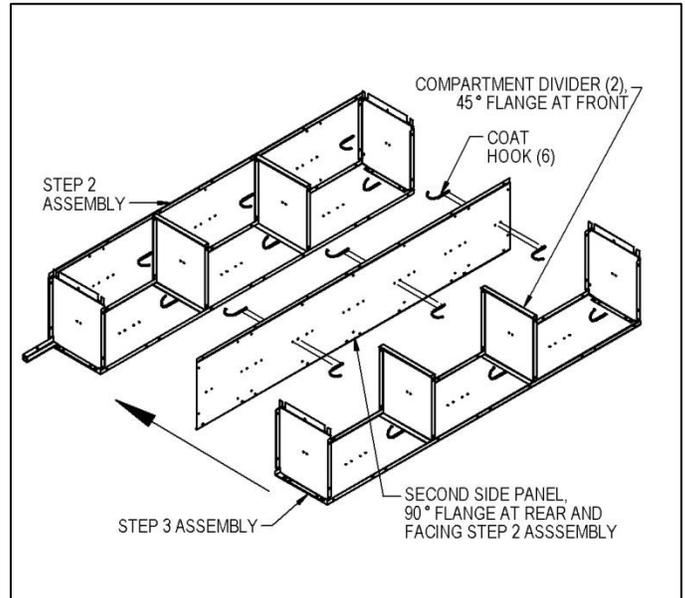

Step 2: Turn the back panel on its back with the shelves pointing upward. Attach the first side panel, the left rear leg, and two compartment dividers to the assembly from Step 1. Attach an additional three coat hooks to the first side panel.

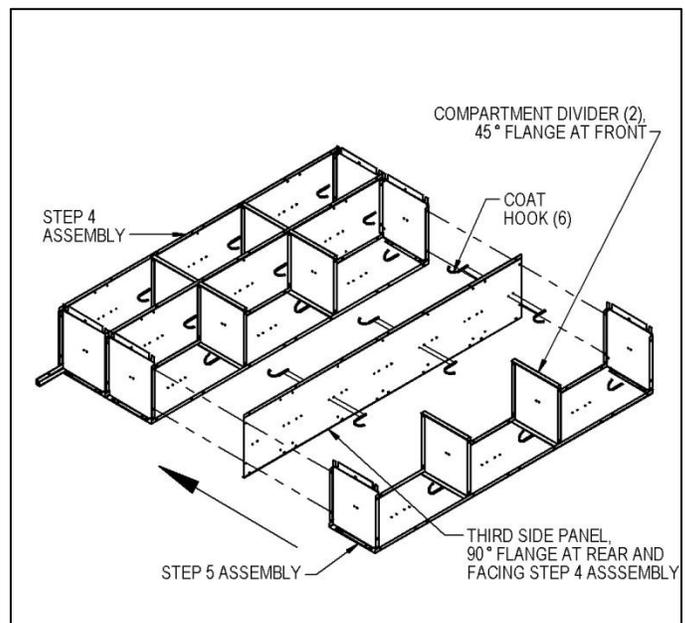

Step 3: Attach the second top shelf, the second bottom shelf, and an additional three coat hooks to the second back panel as in step 1.

Step 4: Simultaneously attach the assembly of Step 3 (second Step 1 assembly), the second side panel, and two additional compartment dividers to the assembly of Step 2. Attach three coat hooks to each side of the second side panel.

Step 5: Attach the third top shelf, the third bottom shelf, and an additional three coat hooks to the third back panel as in steps 1 and 3.

Step 6: Simultaneously attach the assembly of Step 5 (third Step 1 assembly), the third side panel, and two additional compartment dividers to the assembly of Step 4. Attach three coat hooks to each side of the third side panel.

Three Wide Locker Assembly (continued)

Step 7: Attach the last side panel and the right rear leg to the assembly of Step 6. Attach three additional coat hooks to the last side panel. The locker chassis is now complete.

Step 8: Position the pre-assembled door frames onto the assembly of Step 7 then fasten one by one.

Step 9: Tighten all fasteners checking for squareness of the locker while tightening. Attach optional sloping hoods, end bases or front bases (see pages 4 and 5).

Step 10: Place the locker in the installed location and anchor to the floor, wall, or to both. Individual job conditions will dictate the type of fastening anchors to use (not provided).

Step 11: Fasten all lockers in a row together by installing fasteners (provided) through the side panels. Installation is now complete.
