Download and Install the Xodo Smart APP

Download and install the APP. It can be also be found by searching "XODO Smart" by Contixo Inc. in the App Store (for IOS) or Google Play Store (for Android).

Xodo Smart

Open the APP

The welcome screen will appear and then you will be asked to login or register a profile. Register an account by entering your email address and setting up a profile or logging in with an existing account.

Adding Devices

You will be able to manually add a device. Select Plug to continue.

Detecting Device

When detecting devices manually, power on the device and confirm the indicator light is blinking rapidly (Hold the reset button for 5 seconds). Once you confirm the smart device is ready, press the “Confirm indicator rapidly blink” button. Continue on to the next step. Pressing the “Help” button will offer some troubleshooting guidelines to follow.

Connect to a WiFi network

The next step to connect the smart device is to connect to a WiFi network. If the proper network is not listed on this page, select the “Change Network” link to see a list of available networks. Enter the password next to the lock icon. Press “Confirm” to continue.

Connecting

After you hear the beep and continue on, the “Connecting” screen will appear. It will usually register within by approximately 30% range. The Device found will checkmark green, then Initializing device will complete. After connecting process completes it will continue on toward the next screen.

Confirmation Screen

The smart device is added once they are communicating on the same network. You can rename the smart device by clicking on the pencil icon. You can specify the location. Press the Completed button at the bottom of screen to continue to next step.

Home Screen Updated

Now that your device has been added, it will show on the home screen along with all other paired Xodo Smart Products. Now you are all set.

Smart Socket Home Screen

The home screen will show the live plug status.

1. Press the “OFF”/”ON” button to turn off/on the smart plug.
2. Press the “Countdown” button to set countdown on or off.
3. Press the “Schedule” button to set a schedule.

Configure the Smart Socket Settings

Different features can be adjusted from the menu button on the upper right hand button “” on the APP.

1. Device Name can be changed as desired.
2. Device Location can set the location of the plug in your home.
3. supported Third-Party Control provide the information about how to connect your device to Amazon Alexa and Google Assistant.
4. Add Members to be able to control the device in the Share Device setting.
5. Create Group to control other smart device at the same time.
6. Device Information provide network configuration information.
7. Feedback allows users to report issues and get help.
8. Add to Home Screen allows to add the plug to the home screen of your smartphone.
9. Firmware Information allows to check software or install updates to device.
10. Remove device will remove the smart plug from the Xodo Smart app and remove pairing. This is necessary if pairing with a new device.
11. Restore Factory Setting allows to reset the Surge Protector to factory setting.

Setup Google Home APP

Make sure to refer to Google instructions and always follow safety precautions. Here is a quick overview to get setup with Google Home:

Run the Google Home APP and sign in a Google account. Then connect the Google Home APP with your Google Home device according to the Instructions on Google Home.

Choose the WiFi network you want to connect to your Google Home. Then connect it to your Google Home according to the instructions.

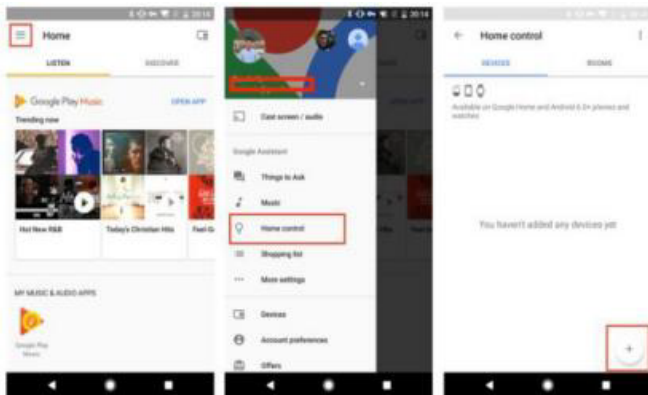

Make sure your Google Home APP and Google Home are in the same WiFi network.

Only Google Home account can be used with “Home Control Action” as a security precaution.

Tap Home Control on the home page, then tap “+”.

Select your region, type your Xodo account, then tap “Link Now”. After you assign rooms for devices you will be listed in the home control page.

Now you can control your smart device through Google Home.

Quick Guide for Using Google Home

Certain third party devices provide extra functionality to your smart products. You will need the following:

1. A Google Home device, Android phone, or tablet with Google Assistant.
2. Google Home APP (Android Only) and a Google account.
3. The device display language must be set to English US.
4. Xodo Smart App and a profile account.
5. Smart device.

Sign in the Xodo Smart account, add the device, then change the name to easily recognize words or phrases such as "bedroom light".

Connect to Alexa

Enable Tuya Smart skill in you Alexa app, then search for "Tuya Smart".
Enable the Tuya Smart Skills.

Input the username and password previously used to register the app.
A confirmation page will be shown when the Alexa account is linked with the Tuya account.

After the accounts are linked, click on "Smart Home" in Alexa, then "discover devices".

Pro Tip: You can also ask Alexa to discovery our devices. Simply say: "Alexa, discover my devices".

Control the Smart Plug through Alexa

A. You can control the smart plug with a simple voice command like:

"Alexa, turn on office plug" or "Alexa, turn off office plug".

B. The name of the device should be the same as you setup in XODO Smart App.
