

BORA®

MITERIX COMPACT™

Find It. Divide It. Cut It.

Works with any angle

Handles all inside or outside angles.

Easily Transfers

Angles straight to the miter saw. Remove wing from the body and place on your miter saw.

Compact Folding

For easy storage in your pocket, tool belt or toolbox.

Save Time & Material

Divides the angle in half for the perfect miter on crown molding, wood casing, to baseboard and trim.

The BORA® Miterix Compact angle duplicator helps turn complex miters into easy cuts. This unique tool finds angles, easily transfers them to table, miter, or band saw, and helps create accurate miter cuts every time. The new compact design fits perfect in a pocket, tool belt, or apron for instant access and convenient portability. With internal and external measuring capabilities, and an angle measuring range from 0°-180°, the Miterix Compact takes the guesswork out of miter cuts. Perfect for crown molding and wood casing to baseboard and trim. Whatever the angle, conquer the most challenging projects simply and accurately, while saving time, money, and wasted material.
