

# HANOVER®

## Electric Halogen Infrared Heat Lamp

*for Hanging or Mounting*

When choosing an outdoor heating system or garage heater, consider Hanover's line of electric infrared heaters. The Hanover halogen infrared heat lamp is highly effective for hanging from the ceiling or mounting to a wall. Use for your patio, porch, balcony, garage, workshop, and more! Extend the use of your outdoor living space with a Hanover mountable infrared heater.

Similar to sunshine, infrared heat is a radiant heat that warms a person or an object directly, rather than heating the air in-between. Infrared heat can be felt instantly as soon as you turn it on – no waiting for it to “warm up”.
