Pack of Hardware	1
Instruction	1

## Q: The lamp does not work?

A: First, make sure your bulbs are working well.

If your bulbs work, but not on the lamp, please pull the copper piece which is located in the bulb socket. This operation is to ensure that the bulb makes good contact with the copper in the bulb socket.

## Installation

**PS:** There is a complete installation video on the product link page. It would be easier to assemble by referring to the installation video.

- ① Fix the main lever knob on the lamp holder.
- ② Fix the "A" curved wood to both ends of the round iron box.
- ③ Fix the "B" curved wood to both ends of the round iron box.
- ④ Use the lifting ring to fix the cover to the upper iron box, and use the ball nut to fix the cover to the lower iron box.
- ⑤ Screw the 1-inch (shorter) screw on the "A" wood bar and the 1.4-inch (longer) screw on the "B" wood bar.
- ⑥ Fix the iron ring on the screw just installed on the wooden bar.
- ⑦ Use the matching nut to tighten the iron ring.
- ⑧ Fix the bracket on the junction box, and then perform hard wiring, "L" is connected to the live wire, "N" is connected to the neutral wire, and the copper wire represents the ground wire, which can be connected to the ground wire at home or wrapped around the green screw on the bracket.
- ⑨ Finally, Cover the box with the stand, then lift the light up and screw the nut on the hanger chain to the stand until it's tight.
