

ADT Keychain Remote

Setup Guide

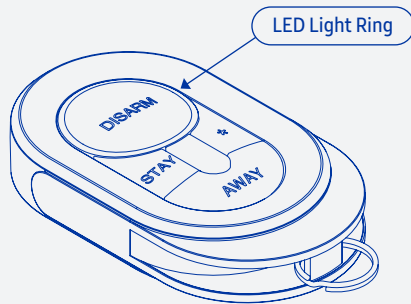

SAMSUNG
SmartThings™

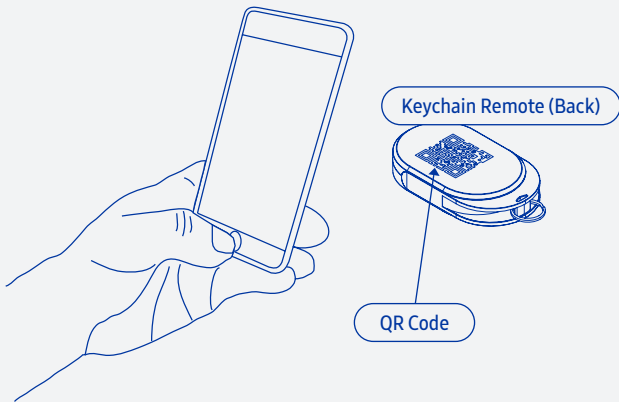

A Setup

Setup

1. Make sure the ADT Keychain Remote is within 15 feet of your SmartThings ADT Security Hub during setup.
 - Once you've set up your remote, you'll be able to use it anywhere within 350 feet from the ADT Security Hub. (Exact range depends on your home's construction, environment, position of the ADT Security Hub, and the position and number of other connected devices.)
 - Make sure that your ADT Security Hub is disarmed before connecting a new device.
 - Make sure that you only setup one new device at a time.
2. Use the SmartThings app on your smartphone to select the "My Home" tab. Select "Things", and then "Add a Thing".
3. Press and hold the "Disarm" and "Away" buttons on the remote for 5 seconds, and then release.

4. Use the SmartThings app to scan the QR code on the back of the remote and then follow the on-screen instructions to complete setup.

5. Remove the QR code from the back of the remote and attach it inside the ADT Security Hub User Guide for future reference.

B Testing

You can test your ADT Keychain Remote by performing a Walk Test on the ADT Security Hub, pressing any button on the remote while within 15 feet of the ADT Security Hub, and then checking its status on the touchscreen. See the ADT Security Hub User Guide for more details.

Note: If you have an ADT professional monitoring service activated, additional testing is required whenever you connect a new device. Follow the on-screen instructions in the SmartThings app to complete testing.

C Use

- Press the **Away** button on your remote for 2 seconds to arm the ADT Security Hub. Door, window, and motion detectors will be armed.
- Press the **Disarm** button on your remote for 2 seconds to disarm the ADT Security Hub. Door, window, and motion detectors will be disarmed.
- Press the **Stay** button on your remote for 2 seconds to arm the ADT Security Hub in Stay Mode. Door and window detectors will be armed.
- Press the * and **Stay** buttons on your remote for 3 seconds to send a panic alert (requires optional ADT professional monitoring service).

D Suggestions

Suggestions

The ADT Keychain Remote allows you to arm or disarm your SmartThings ADT home security system at the press of a button, or to send a panic alert to ADT professional monitoring services (additional fees apply).

There are many ways you can use an ADT Keychain Remote:

- Use one to arm your system and set it to initiate optional ADT professional monitoring services if an intrusion is detected in your home (additional fees apply).
- Use one to disarm your system and set it to turn on connected lights when you arrive home in the evening.

- Use one to arm your system and set it to turn down a connected thermostat when you leave.
- Use one to disarm your system and set it to turn on connected speakers when you come home.

E Works With SmartThings

SmartThings works with a wide range of connected devices, including lights, cameras, locks, thermostats, and sensors. It also works with the **Google Assistant** and **Amazon Alexa** so you can control your smart home with voice commands.

Look for the **Works with SmartThings** label next time you're buying a connected device for your home, or visit **SmartThings.com** to see the full list of compatible devices.
