Care and Maintenance

Our steel components for garden accessories and furniture are treated with rust inhibiting paint that protects it from rusting. However, due to the nature of steel, surface oxidation (rusting) will occur once these protective coatings are scratched. This is not a defect and thus not covered by the warranty.

To minimize this condition, we recommend care when assembling & handling the product to prevent scratching the paint. Should any scratching or damage occur, we recommend immediate touch-up with rust inhibiting paint.

Surface rust can also be easily removed with a very light application of common cooking oil. If surface oxidation (rusting) occurs and if no measure is taken to prevent this, the oxidation may start dripping on to deck or patio and caused damaging stains, which may be difficult to remove. This can be prevented if the above-mentioned measures are taken to keep the product from oxidizing.

Use damp cloth to wipe off the stains as quickly as possible.

If necessary, wash with a mild solution of soap and water; rinse thoroughly and dry completely.

Periodically check and ensure that all bolts are well-tighten during use

Care and Maintenance

Les composants en acier de nos meubles et accessoires de jardin sont traités avec une peinture antirouille qui les protège. Toutefois, en raison de la nature de l'acier, une oxydation de la surface (rouille) se produira si ces revêtements protecteurs sont égratignés. La garantie ne couvre pas ce phénomène puisqu'il ne s'agit pas d'un défaut.

Afin de minimiser cette situation, nous recommandons d'être prudent lors de l'assemblage et de la manipulation du produit afin d'éviter d'égratigner la peinture. En cas d'égratignure ou de dommage, nous recommandons d'effectuer immédiatement une retouche avec une peinture antirouille.

La rouille de surface peut facilement être retirée à l'aide d'une petite quantité d'huile de cuisson. Si une oxydation (rouille) de la surface se produit et qu'aucune mesure n'est prise pour corriger la situation, la rouille pourrait couler sur la terrasse et causer des taches dommageables qui peuvent être difficiles à enlever. Cela peut être évité si les mesures mentionnées ci-dessus sont prises pour empêcher l'oxydation du produit.

Utilisez un linge humide pour essuyer les taches le plus rapidement possible.

Au besoin, nettoyez le produit avec une solution d'eau et de savon doux, rincez-le abondamment et séchez-le complètement.

Vérifiez périodiquement pour vous assurer que tous les écrous sont bien serrés pendant l'utilisation.
