## HERE'S HOW TO TAKE CARE OF ME

## Dracaena

### LIGHT

I tolerate low light well, but will grow best in bright spots. Direct sunlight will burn my leaves. I will grow more slowly and may show less coloration in low light.

### FOOD

Feed me once or twice a year during Spring and Summer with a fertilizer formulated for houseplants.

### WATER

Water me when the top couple inches into the soil are dry, allow water to drain thoroughly; remove any excess water. Too much water can make the roots drown and die.

### FEATURES

I am super-easy to grow and can purify the air and I am super easy to grow.

### GROWING TIPS

Use rain or distilled water. You can use tap water if it is left overnight in an open container.

### GIVE ME FRIENDS

(I play well with)

Arrowhead Plant, Calathea, or  
ZZ Plant
