

United Porte - Door Operating Guide

Introduction

Thank you for choosing United Porte doors. This guide provides essential information for operating, adjusting, and maintaining your door system to ensure safety, functionality, and longevity.

Basic Operation

- Open and close the door using the handle or knob provided.
- Avoid slamming the door; this can damage the hinges and hardware.
- Ensure that the latch clicks into the strike plate fully when closed.
- For sliding or pocket doors, ensure the track is clear of debris.

Hinged Doors

- Check that hinges are tight and aligned.
- Use only the appropriate amount of pressure to swing the door.
- Keep hinge pins lubricated for smooth operation.

Sliding Doors

- Regularly clean the bottom track to avoid buildup.
- Lubricate rollers and check for wear.
- Make sure the door is aligned in the track to prevent derailment.

Pocket Doors

- Ensure the internal track is free of obstructions.
- Use the edge pull hardware gently.
- Lubricate the track and check rollers annually.

Bifold Doors

- Always open and close bifold panels in the sequence intended.
- Tighten pivot brackets and lubricate the top guide pin as needed.

United Porte - Door Operating Guide

Soft-Close Mechanisms

- Do not force doors with soft-close hardware.
- Allow the mechanism to engage naturally.
- Periodically check for alignment and debris.

Child Safety

- Use childproof locks if doors are installed in nurseries or playrooms.
- Avoid placing fingers near hinges or door edges when closing.

Environmental Conditions

- Maintain relative humidity between 25%-55% and temperatures between 50 degreesF and 90 degreesF (10 degreesC - 32 degreesC).
- Sudden environmental changes may cause temporary warping or swelling.

Maintenance

- Inspect hardware every 6 months for wear.
- Use non-abrasive cleaners for surface maintenance.
- Touch up scratches with matching finish pens or polish.
