## CARE and MAINTENANCE

**This furniture is designed for indoor use.**

Damage to furniture can come from temperature changes in relative humidity (RH) in our homes. Humid air oxidizes metal which results in rusting, corrosion, tarnishing and roughness. Wood absorbs water as relative humidity rises and falls, and in doing so it swells and shrinks.

To protect against the humidity effect, the metal is powder coated. The powder coat layer protects the metal from oxidizing, corrosion, tarnishing and scratching and keeps it looking good for years to come. The wood is sealed and lacquered to protect against humidity.

**To help protect your furniture, follow these steps:**

- Use a humidifier, preferably one with an automatic control system that can sense the humidity level and adjust itself accordingly.
- Dust with soft dry cloth.
- Wipe up spills promptly. Clean with a dry cloth.
- Do not use abrasive cleaners, chemical solvents, strong detergents, cleaners with bleach, and furniture polish.
- Use soft felt base coasters, placemats to help prevent scratches.
- Keep furniture out of direct sunlight, which can cause cracking or roughness on the protective layer.
- If it can be avoided, do not put furniture near heating vents. Keep the furniture 3 to 4 inches away from the wall, giving heat and air space to circulate.

## FURNITURE TIP OVER RESTRAINT ASSEMBLY

### WARNING

Serious or fatal crushing injuries can occur from furniture tip-over. If the furniture tip over restraint kit is not in the box, please contact our customer service department in order to obtain another kit before using the furniture.

### STEP-23

NOTE: The screwdriver is not included in the hardware pack.

## FURNITURE TIP OVER RESTRAINT ASSEMBLY

### Furniture Tip Over Restraint Instructions:

1. Attach one of the mounting brackets securely to the back edge of the furniture. Use the shorter screw.

2. Determine where furniture is to be placed and mark location on the wall for mounting bracket screw hole approximately 2 inches **below** the bracket mounted to the furniture.

3. Drill a 3/16 inch hole in the wall. Press the plastic anchor into the hole and gently tap until the flange on the anchor is against the wall surface.
4. Position the bracket over the anchor and use the longer screw to securely attach the bracket to the wall.
5. Place the furniture so the back edge is in line with the bracket on the wall.
6. Lace an end of the nylon zip-tie strap down through each bracket. Bring both ends together and slide the smooth side upright through the square-shaped end and pull through to create the "locked" position.
7. Check to make sure the strap is securely laced and locked to the brackets.

- **DO NOT** put a TV or other heavy objects on top of a chest of drawers or any other furniture not intended for use with a TV
- **DO NOT** place heavy objects in top drawers
- **DO NOT** let children climb or hang on drawers, doors or shelves
