- Read instructions, cover to cover-

- Have 2 adults on hand for assembly-

- Do not assemble on flooring or carpet-

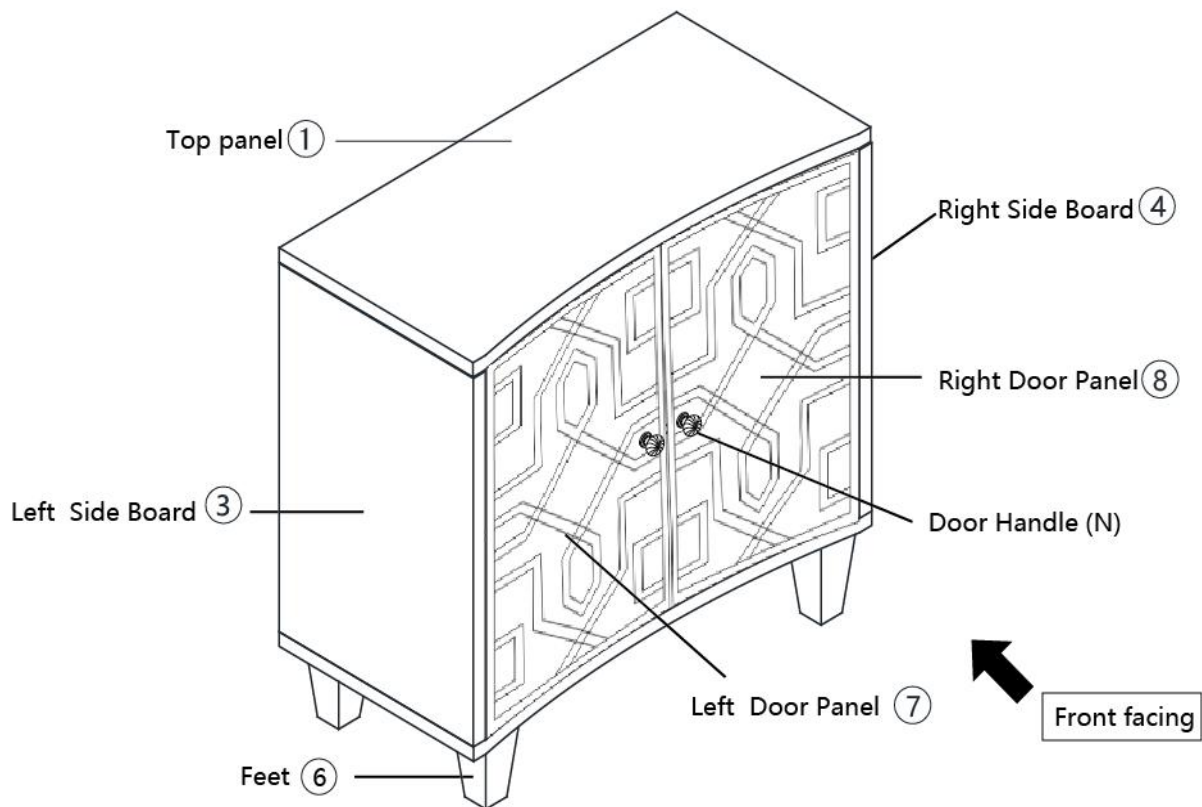

- Assemble on a clean non-marring surface (packing foam)-

- Save all packaging until finished-

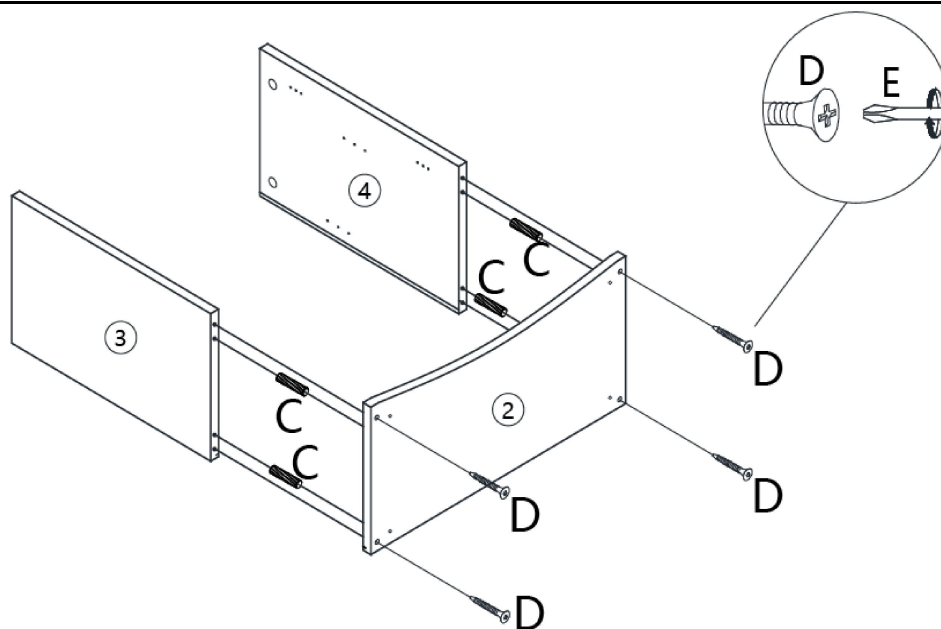

Assembly Steps

Overview

This Accent Cabinet has multiple parts and may require up to some 60 minutes to assemble. To give you an overview of the Accent Cabinet parts, the above picture is to help you put the various parts into perspective. Please read through the instructions below to familiarise yourself with the parts and steps before assembly.

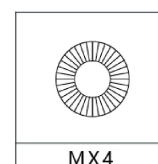

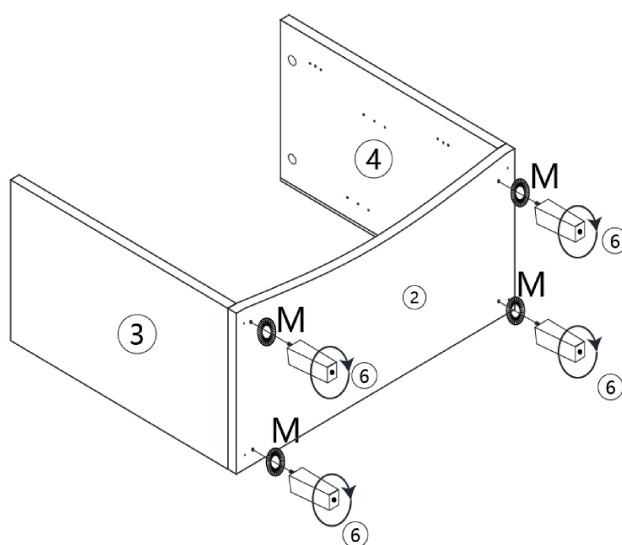

Step 1

Ø6x30mm		Ø 5x60 mm
CX4	EX1	DX 4

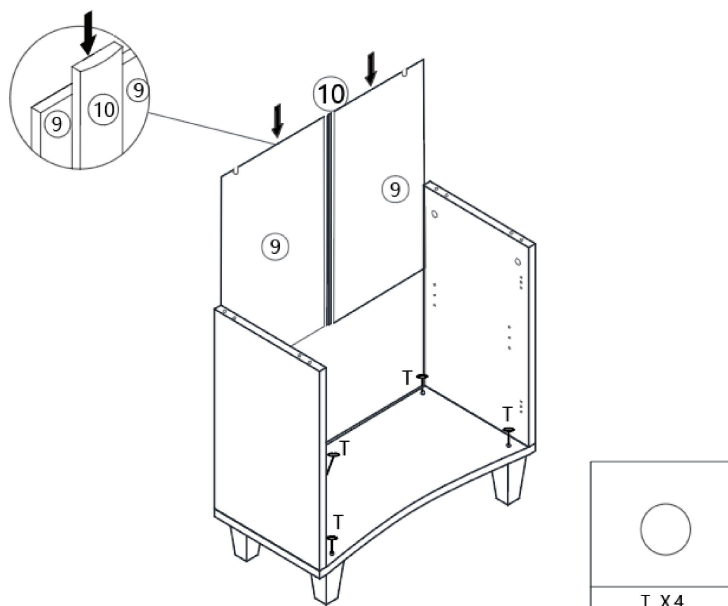

1. Take the left side panel ③ and the right side panel ④, take the bottom panel ②, align the bottom panel with the bottom edge of the side panels, insert the Wood dowel (C) into the corresponding hole in the connection area between the side panel ③ ④ and the bottom panel ②, and use a screwdriver (E) to tighten the screws (D) to make sure that the connection is secure.

Step 2

Fit plastic washer (M) into wood foot nut, then screw four feet(⑥) onto bottom panle(②)

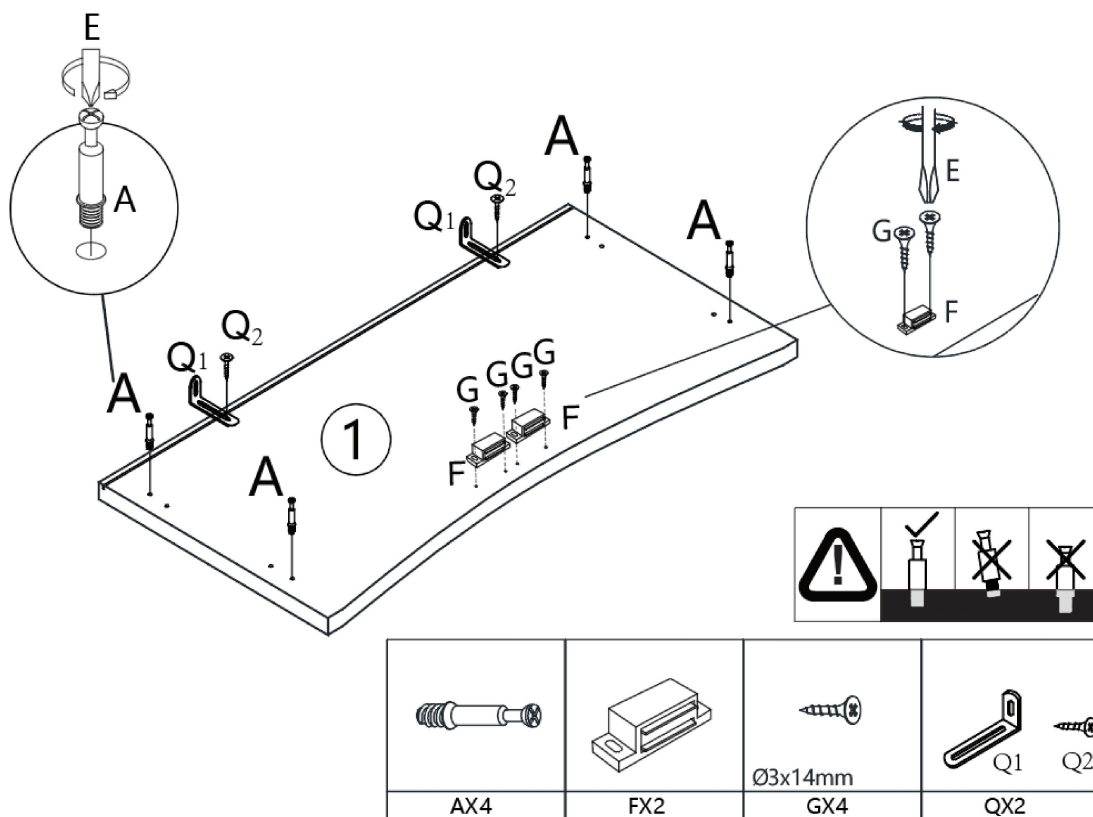

Step 3

Insert the two back panels ⑨ and connect them with the back panel strip ⑩ in the center.

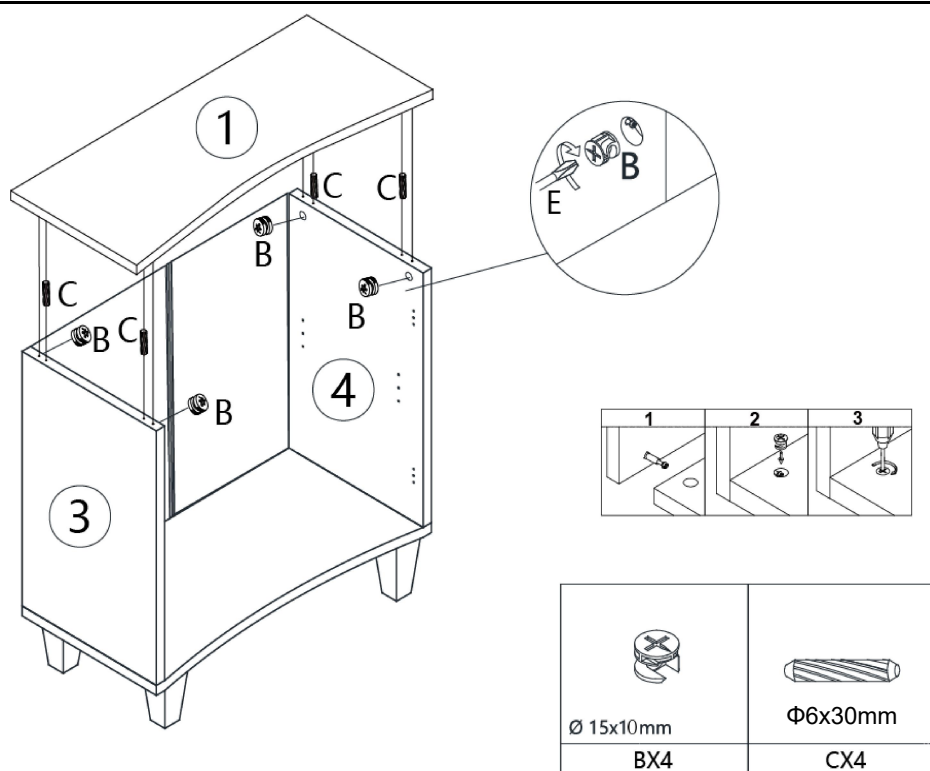

The holes for the screws, affixed with (T).

Step 4

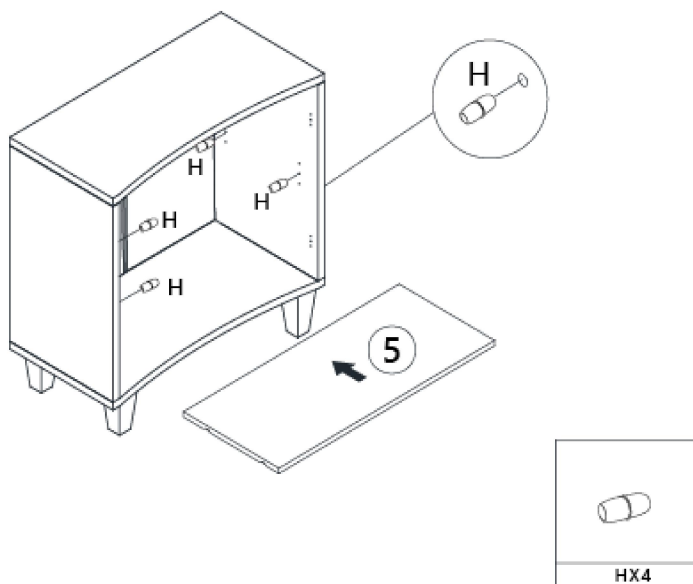

Mount cam lock bolt (A), magnetic collision contact (F), and furniture tipping restraint (Q) on top panel. (①)

Step5

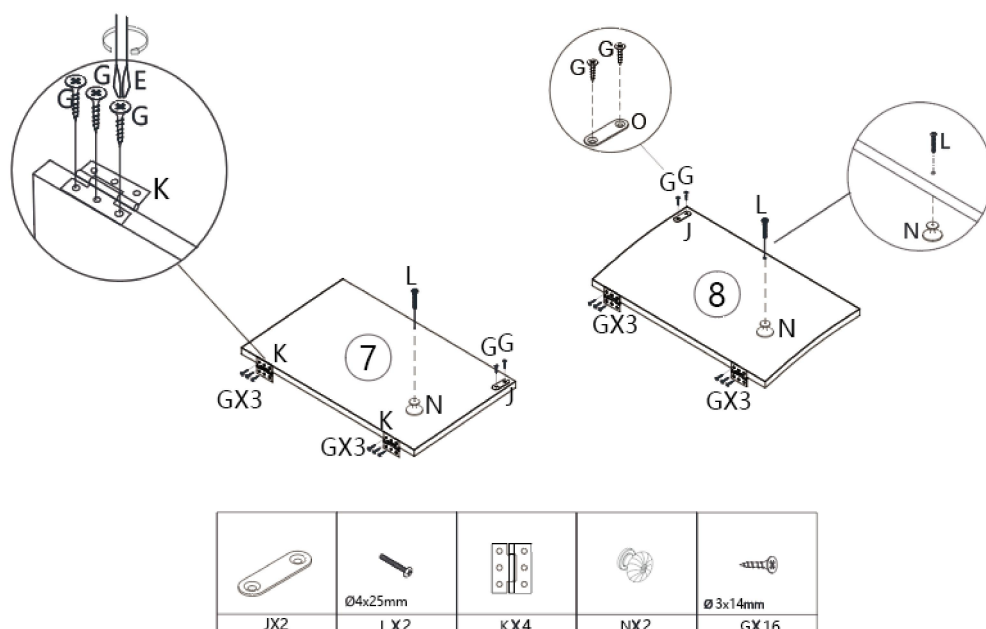

1. Place the top panel① on top of the assembled cabinet frame so that the edges of the top panel align with the top edges of the side panels and back panels. Insert holes for Wood dowels(C) in the corresponding holes in the connection area between the top panel① and the side panels so that the dowels are tightly connected to the top panel and the side panels.
2. The dowels are then secured using eccentric wheels Cam Lock Nut(B). Pass the screw portion of the eccentric wheel through the corresponding pre-drilled hole, but do not tighten. Next, use a screwdriver (E) to rotate the eccentric part of the eccentric wheel so that the top panel and the side panel fit tightly, and finally tighten the screw on the eccentric wheel to ensure a firm connection. Follow this method of installing the eccentric wheel at each connection point to ensure a stable top panel installation.

Step 6

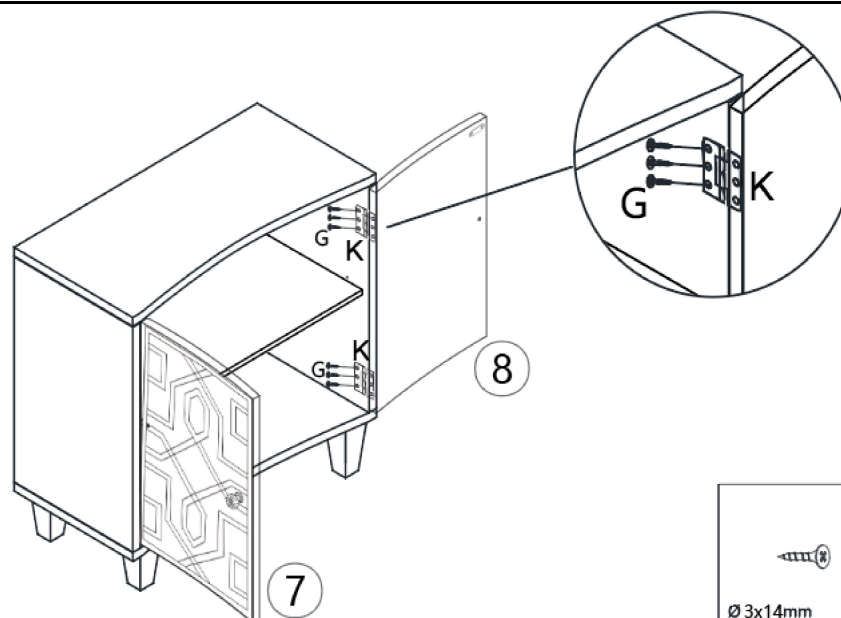

Insert shelf nail(H) on two side panel(③④), then place layer panel(⑤)

Step 7

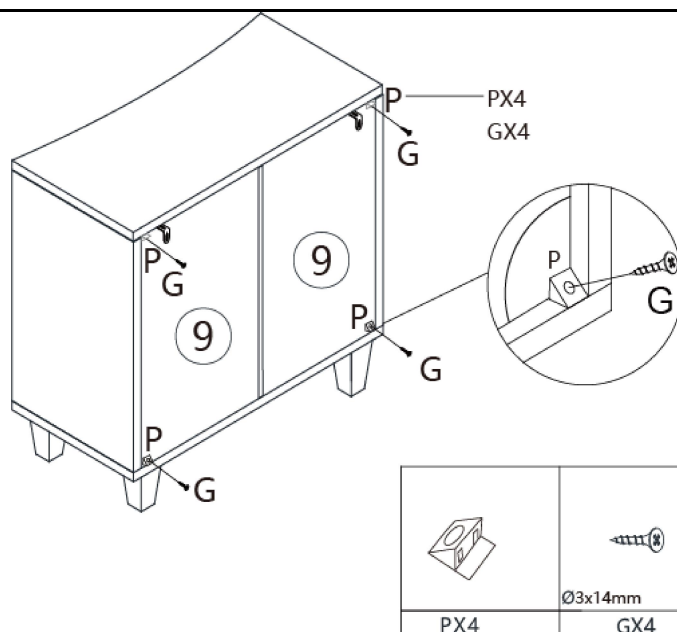

1. First, install one half of the hinge (K) on the cabinet door ⑦ using screw (G).
2. Then attach the Pull handle (N) to the cabinet door ⑦ using screws (L). Take care that the screws are tightened to ensure that the pulls are securely installed and will not loosen or wobble.
3. Fit magnetic collision (J) on the left door (⑦) using screw (G).
4. Repeat the above steps to install the other cabinet door ⑧.

Step 8

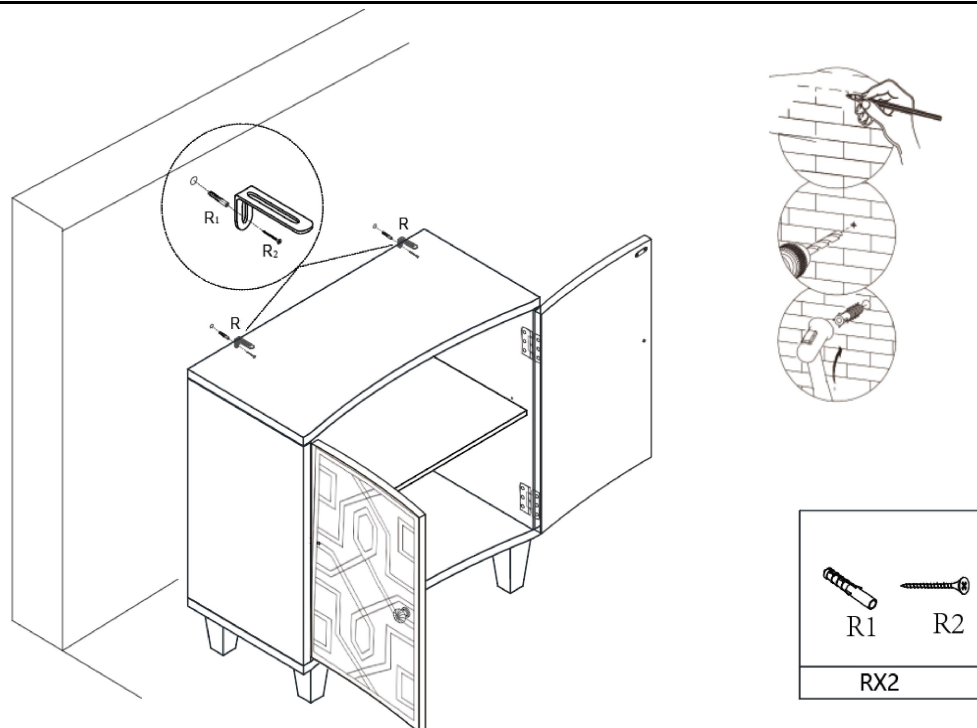

Install the other half of the hinge(K) on the side panel, securing it with screws (G).To attach the left and right door panel(7)(8) on the cabinet. So that the cabinet door is aligned with the edge of the cabinet frame and the door gap is even .

Step 9

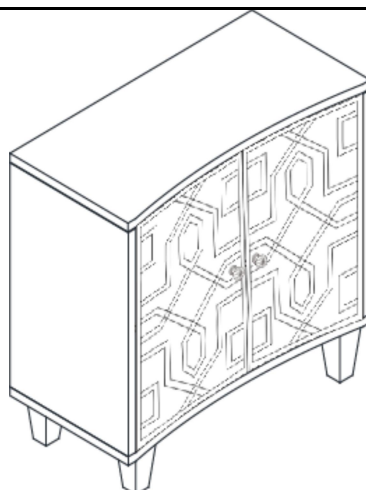

Fit back panel bracket (P) on the back of the cabinet with screws (G).

Step 10

Align the cabinet with the wall and slats. Screw the expansion screws(R) into the wall, then connect the other end of the anti-tip device(R) to the expansion screws on the wall and tighten the screws to ensure that the anti-tip device (R) is firmly installed and can effectively prevent the cabinet from tipping over.

Step 11

Your cabinet is ready for use. This cabinet can only be used on a flat and level surface.
