#### CERTIFICATE OF LISTING

IAPMO Research and Testing, Inc. is a product certification body which tests and inspects samples taken from the supplier's stock or from the market or a combination of both to verify compliance to the requirements of applicable codes and standards. This activity is coupled with periodic surveillance of the supplier's factory and performance as well as the assessment of the supplier's Quality Assurance System. This listing is subject to the conditions set forth in the characteristics below and is to be construed as any recommendation, assurance or guarantee by IAPMO Research and Testing, Inc. of the product except as by Automatic Testing Procedures.

Effective Date: August 2013 Void After: August 2016  
Product: Plumbing Fixture Fittings File No. 6737

Issued To: Kaiping Heart Cartridge Co., Ltd.  
No. 28 Heliwan Dong Road,  
Shilong Town,  
Kaiping City, GUANGDONG  
China

Identification: Plumbing supply fittings complying with this Standard shall be marked with the manufacturer's recognized name, trademark, or other mark or, in the case of private labeling, the name, trademark or other mark of the customer for whom the fitting was manufactured. The marking shall be accomplished by use of a permanent mark or by placing a permanent label on the product. Markings on plumbing supply fittings shall be visible after installation.

Single-handle, single-control, and automatic compensating mixing bath and shower valves shall have identifiable temperature control settings in which the settings are indicated by words ("cold", "warm", "hot", etc.), by numbers, or graphically.

Packages shall be marked with the manufacturer's name, trademark, or other mark as well as the model number or, in the case of private labeling, the name, trademark, or mark of the customer for whom the fitting was manufactured as well as the model number.

# INSTALLATION STEPS

This product has been inspected and debugged by the factory to the best condition. Please do not disassemble and assemble it yourself.

Before installing the faucet, please be sure to remove sundries and sludge from the water pipe to prevent sundries from blocking the faucet.

1. According to the basic size of the embedded box, use a special tool to open the main hole on the solid wall. The depth of the hole is shown in the figure. It should be considered that the distance between the surface of the wall after the final treatment and the bottom of the hole is between 2.55" and 2.95".

2. Reference reserved size 7.48\*5.31"

3. As shown in the figure, the inlet and outlet pipes should be embedded well, pay attention to the up and down, left and right directions on the embedded box.

4. Open the water source to test whether the right and left water inlet pipes are tightly connected without leakage, and adjust the inlet pipes after the test is completed. The flow switch is in the open state to test whether the upper mixed outlet pipe is tightly connected without leakage, at the same time, the water retention function is fixed on the solid wall with self-tapping screws according to the embedded box.

# INSTALLATION STEPS

5. As shown in the figure,after the installation of the embedded box,it is necessary to make sure that the mercury is in the center of the level. If it is tilted, it will affect the installation effect of the panel.

7. As shown in the figure,the leakage embedded box shall be removed,and the subsequent installation of control valve can be carried out after the wall room is laid.

8. The notch of the upper hand wheel shall be inserted straight to the bottom, and the screw and hand wheel button shall be tightened; The lower hand wheel button is facing up, and the whole hand wheel is pressed to the end. When you hear the sound, you can finish it.

6. Once again,make sure that the pipe connection is correct and there is no leakage in the water test.After the other embedded components of the shower are installed,the embedded box and the pipeline are sealed and fixed with fillers.At this point, the installation of the solid wall embedded box is completed, and the installation cover of the level meter is removed.

9. Install shower arm and shower head.  
Install lower outlet pipe.  
(wrap the PTFE tape on the thread).

# INSTALLATION STEPS

## CLEANING CARE

In order to keep the appearance of faucet clean, bright and good performance, please take care of the faucet as follows;

1. Rinse with water only and dry with soft cotton cloth;
2. Use mild liquid and colorless glass cleaner to remove surface dirt and scale film, or use polish without abrasive effect;
3. Do not use abrasive detergent, polish, emery cloth, paper towel or scraper, etc.;
4. Do not use acid cleaner, or cleaner and soap with insoluble gran etc.;
5. In the process of use, mud may accumulate in the bubbler and make the water flow show, The bubbler can be unscrewed, rinsed with water, and then installed back in place.
