# Installation Tips:

1. Press the switch button repeatedly to choose
your preferred working mode.

White: Light illuminates white.
Color change: Light rotates through 7 colors
(Red, Orange, Yellow, Green, Cyan, Blue and Purple).
Color lock: Light remains locked on chosen color
last illuminated during Color Change mode.

2. Make sure you remember to peel off the protective
cover on the solar panel.

1. Install solar pathway light in early morning to
ensure maximum charge.
2. Pick a suitable location with direct sunlight,
avoid placing lights under trees or under roof coverings.
3. Twist and secure the lens to the top housing.
Then attach the light assembly to the mounting pole
and the ground stake.
4. Push the pathway light into the ground.
