

Product Dimensional Drawing

More Info:

The Aerial Tool Bin offers a safe and efficient way of storing your tools at waist height while on a variety of Aerial Access Equipment.

It is designed to be used on:
Aerial Platforms, Scissors Lifts,
Boom Lifts, Scaffolding, Swing
Stage Railings, and Mast
Climbers.

Features:

- Made of reinforced, high density, non-conductive, UV protected, light-weight durable safety orange polypropylene
- Fits square or rounded 90 degree corners
- Two removable partition walls allow you to keep your tools separated and organized
- Built in handle for easy transport
- Steel inserts along top edges for use with magnetic components. (Purchase magnetic components separately.)
